

RESEARCH OPPORTUNITIES ALERT!

Issue 13: Volume 1a RESEARCH GRANTS FROM OTHER DONORS

(QUARTER: APRIL - JUNE, 2013)

A Compilation by the

Research Services Unit
Office of Research, Innovation and Development (ORID)

March 2013

APRIL 2013

HRÉTIEN INTERNATIONAL RESEARCH GRANTS

American Astronomical Society

Description:

The American Astronomical Society invites applications for the Chrétien international research grants. These grants are intended to further international collaborative projects in observational astronomy. The emphasis is on long-term international visits and the development of close working relationships with astronomers in other countries. Preference will be given to individuals of high promise who are otherwise unfunded. Innovative technical approaches including the development and use of new optics, new devices and new techniques will count heavily in the applicant's favour.

Astronomers with a PhD or equivalent may apply; graduate students are not eligible. Up to US\$20,000 will be awarded to one or more individuals or groups to be used for the international support of observational astronomy. The awards are open to astronomers throughout the world.

Closing date: 01 Apr 13

Deadline information: This call is repeated

once a year.

Posted date: 01 Mar 12

Award type: Directed grants for individual investigators, Access to laboratories, telescopes etc., Travel for research purposes

Award amount max: \$20,000

AAS 2000 Florida Ave NW Suite 400 Washington, DC 20009

Tel: +1 202 328 2010 Email: grants@aas.org

Description:

The Cystic Fibrosis Foundation invites letters of intent for its research grants. These aim to development encourage the of new information that contributes the understanding of the basic aetiology and

pathogenesis of cystic fibrosis. Priority will be placed on those projects proposing to better understand the mechanisms behind disease pathophysiology and to develop strategies to prevent or treat it. All proposals must be hypothesis-driven and sufficient

preliminary data must be provided to justify foundation support. Information derived from such study will hopefully lead to submission to other funding agencies. Studies may be carried out at the sub-cellular, cellular, animal or patient levels. Funding of US\$90,000 per year is available for two years, after which a grant may be renewed for another year.

Closing date: 01 Apr 13

Deadline information: Letters of intent due 1 April; full applications 5pm EDT, 11 September 2013. This call is repeated once a vear.

Posted date: 03 Oct 12

Award type: Directed grants to institutions, research groups etc, Directed grants for

individual investigators Award amount max: \$270,000

ILOT AND FEASIBILITY AWARDS Cystic Fibrosis Foundation

Description:

The Cystic Fibrosis Foundation invites letters of intent for its pilot and feasibility awards. These grants are for developing and testing new hypotheses or new methods and to support promising new investigators as they establish themselves in research areas relevant to cystic fibrosis. Proposed work must be hypothesis-driven and must reflect innovative approaches to critical questions in cystic fibrosis research. Up to US\$40,000 per year for two years may be requested.

Closing date: 01 Apr 13

Deadline information: Letters of intent 1 April; full applications 5pm EDT, 11 September 2013. This call is repeated once a vear.

ONSTANT H JACQUET RESEARCH AWARDS

Religious Research Association

Description:

The Religious Research Association invites applications for the Constant H Jacquet research awards. These small research grants primarily support applied, client-centred projects, but basic research is also regularly funded. The association's committee especially encourages proposal submissions from scholars who are in the early stages of their careers, as well as proposals from students.

Applicants are required to be members of RRA. Full-time students may join the association at the time of their application. All others must hold membership in RRA for at least one full year prior to the application deadline.

The total funding amount in 2013 is US\$18,000, with individual grants usually not exceeding US\$4,000. Funds may be used for research expenses and release time, but not supplemental income or capital equipment.

Closing date: 01 Apr 13

Deadline information: !! Call has not yet been announced by sponsor but this is the approximate deadline we expect. This call is

repeated once a year. Posted date: 11 Mar 09

Award type: Directed grants for individual

investigators

CIENTIFIC OCEAN DRILLING RESEARCH Integrated Ocean Drilling Program

Description:

The Integrated Ocean Drilling Program announces the availability of funds for scientific ocean drilling research. Individual scientists or groups of scientists with a new idea for scientific ocean drilling may submit preliminary proposals. Preliminary proposals should:

- state the scientific objectives and explain how those objectives relate to, or advance beyond, the IODP initial science plan;
- justify the need for drilling to accomplish the scientific objectives;
- present a well-defined strategy for addressing the scientific objectives through drilling, logging, or other down-hole measurements;
- describe the proposed drill sites, penetration depths, expected lithologies, and available site-survey
- describe briefly any relationships to other international geoscience programs.

Closing date: 01 Apr 13 (Forecast)

Deadline information: !! Call has not yet been announced by sponsor but this is the approximate deadline we expect. Deadline: 23:59pm GMT April 1 and October 1 annually

IGMA THETA TAU INTERNATIONAL/ASSOCIATION OF NURSES IN AIDS CARE Sigma Theta Tau International

Description:

Sigma Theta Tau International and the Association of Nurses in Aids Care invite applications for their research grant. This encourage research aims career development of nurses through support of clinically oriented HIV/Aids research, and to increase the number of HIV studies done by nurses. Eligible research includes studies focused on HIV prevention, symptom management, promotion of self-care and adherence. Proposals for pilot or developmental research may also be submitted.

Applicants must be registered nurses with a current license and must also have a master's degree or be enrolled in a doctoral programme. Membership of one organisation is required, and preference will be given to members of both STTI and ANAC.

Funding of up to US\$2,500 is available.

FRICAN GUEST RESEARCHER'S SCHOLARSHIP PROGRAMME

NordiskaAfrikainstitutet - Nordic Africa Institute

Description:

The Nordic Africa Institute invites applications for its African guest researcher's scholarship programme. This scholarship enables African scholars engaged in research on the African continent to pursue their own research projects at the Nordic Africa Institute in Sweden. The applicants' research projects must relate to the following thematic research clusters at the institute:

- agrarian change, and property resources;
- conflict, displacement and transformation;
- globalisation, trade and regional integration;
- urban dynamics.

Applicants should be placed at or affiliated with an African university or research institution and hold a proven track record of extensive research experience. Applications from women are particularly encouraged.

The scholarship, which is available for two to three months, includes return economy-class accommodation, airfare, a subsistence allowance of SEK300 per day, an installation grant of SEK2,500, a shared office, and free photocopying facilities up to a maximum of 1,000 copies.

Closing date: 01 Apr 13

■ MALL EXPLORATORY GRANT Scoliosis Research Society

Description:

The Scoliosis Research Society invites applications for a small exploratory grant. This grant is designed specifically for new investigators who have a preliminary concept they would like to develop into a research project. Applicants do not need to be members of the society to apply. The society has identified the following areas as important research topics:

- evidence based medicine;
- idiopathic scoliosis;
- aetiology;
- non-op and operative treatment;
- 3D deformity of the spine and thorax;
- adult deformity;
- treatment and outcomes;
- osteoporosis, in particular osteoporotic spine fractures, its impact on scoliosis kyphosis management, and how it relates to spinal deformity and instrumentation;
- early onset scoliosis treatment;
- sagittal imbalance;
- congenital scoliosis;
- neuromuscular spinal deformity;
- deformity and reconstruction arising from spine and sacral tumour treatment;
- thoracic insufficiency associated with spinal deformity in children;
- pulmonary outcome sequeallae following common natural history of spine deformity and treatment history.

The maximum grant award for this category is US\$10,000. The maximum duration of research is one year.

Closing date: 01 Apr 13

Deadline information: Deadlines on: 1 April 2013, 1 October 2013, and repeated annually.

Posted date: 09 Nov 12

Award type: Young investigator awards, Directed grants for individual investigators

Award amount max: \$10,000

EW INVESTIGATOR GRANT Scoliosis Research Society

Description:

The Scoliosis Research Society invites applications for a new investigator grant. This grant is specifically targeted to new investigators. It will not be awarded to those who have received prior funding from national granting organisations. Applicants do not need to be members of the society to apply. The society has identified the following areas as important research topics:

- evidence based medicine;
- idiopathic scoliosis;
- aetiology;
- non-op and operative treatment;
- 3D deformity of the spine and thorax;
- adult deformity;
- treatment and outcomes;
- osteoporosis, in particular osteoporotic spine fractures, impact scoliosis kyphosis on management, and how it relates to spinal deformity and instrumentation;
- early onset scoliosis treatment;
- sagittal imbalance;
- congenital scoliosis;
- neuromuscular spinal deformity;
- deformity and reconstruction arising from spine and sacral tumour treatment;
- thoracic insufficiency associated with spinal deformity in children;

pulmonary outcome sequeallae following common natural history of spine deformity and treatment history.

The maximum award is US\$25,000, and the duration of research may extend up to two years.

Closing date: 01 Apr 13

Deadline information: Deadlines on: 1 April 2013, 1 October 2013, and repeated annually.

TANDARD INVESTIGATOR GRANT Scoliosis Research Society

Description:

The Scoliosis Research Society invites applications for a standard investigator grant. These grant applications may be in any area of spinal deformity research, although an additional funding source for grants focusing on the aetiology of scoliosis is available in conjunction with the Cotrel Foundation. Applicants do not need to be members of the society to apply. These applications require evidence that the investigator has the appropriate experience and resources.

The society has identified the following areas as important research topics:

- evidence based medicine;
- idiopathic scoliosis; •
- aetiology;
- non-op and operative treatment;
- 3D deformity of the spine and thorax;
- adult deformity;
- treatment and outcomes;
- osteoporosis, particular in osteoporotic spine fractures, impact on scoliosis kyphosis management, and how it relates to spinal deformity instrumentation;
- early onset scoliosis treatment;
- sagittal imbalance;

- congenital scoliosis;
- neuromuscular spinal deformity;
- deformity and reconstruction arising from spine and sacral tumour treatment;
- thoracic insufficiency associated with spinal deformity in children;
- pulmonary outcome sequeallae following common natural history of spine deformity and treatment history.

This grant is awarded a maximum of US\$25,000 per year for up to two years, the maximum total award being US\$50,000.

▼ SI/ISID INFECTIOUS DISEASES RESEARCH FELLOWSHIP PROGRAMME

International Society for Infectious Diseases

Description:

The International Society for Infectious Diseases, in partnership with the Swiss Society for Infectious Diseases, invites applications for the SSI/ISID infectious diseases research fellowship programme. The aim of this programme is to support infectious disease physicians and scientists from developing and middle-income countries through multidisciplinary clinical and laboratory training at select biomedical institutions in Switzerland. The programme offers opportunities for training and research in a variety of areas ranging from basic studies of the mechanism of disease to studies in public health, epidemiology, diagnostics, therapeutics or vaccine development.

Applicants must be citizens or permanent residents of developing countries or Eastern Europe, and must have an MD or PhD in a relevant filed. Applicants should also hold a position at a medical, research or public health programme and have sufficient language skills of French or German, in addition to English.

The fellowships, which last for one year, offer financial support of up to SF36,000 for travel and living expenses.

Closing date: 01 Apr 13

Deadline information: This call is repeated

once a year.

ESEARCH AWARDS European Society of Veterinary Dermatologists

Description:

Society of Veterinary European Dermatologists invites applications for its research award. This aims to encourage high standards in all aspects of veterinary dermatology and to promote development of related research. Proposals in both basic and clinical research in veterinary dermatology are welcome. The following grants are available:

- major grant of up to €20,000 for an outstanding advanced research project;
- training grant of up to €5,000 for a researcher seeking to become established in the discipline and carry out a research project;
- practitioner grant of up to €5,000 for veterinary practitioners working exclusively in private practice with an ambition to carry out research.

Projects may last between one and two years.

Closing date: 01 Apr 13

Cactus and Succulent Society of America

Description:

The Cactus and Succulent Society of America invites applications for its research grants. The grants support research on succulent plants. General research topics include:

- discover new species or forms;
- ecological associations;

- increase knowledge of taxonomy, nomenclature, and biogeography;
- relating to all aspects of cultivation, artificial propagation and production;
- relating to conservation of threatened or endangered species;

basic biology, such as morphology and physiology, especially as these relate to the needs and interests of hobbvists.

The grants are open to to all applicants without regard to gender, age, nationality, or affiliation.

Typical awards range up to \$1,200-\$1,500.

Closing date: 01 Apr 13

Deadline information: Deadlines on: 1 April 2013, 1 November 2013, and repeated

annually.

TUDENT RESEARCH GRANTS American Hemerocallis Society

Description:

The American Hemerocallis Society invites applications for its student research grants. The graduate grants support undergraduate students or faculty/staff using daylilies (plant genus Hemerocallis) as experimental organisms in original research projects. Fundamental areas of investigation are encouraged, such as:

- banded chromosome preparations;
- gene mapping;
- fine structural studies of vegetative or reproductive parts;

- microscopic analysis of the ontogeny of flower scapes in the crown;
- effect of various hormones on plant growth formation and of proliferations on scapes.

Practical areas of study are encouraged, such as:

- hardiness of various cultivars in different climatic zones;
- use of microtubule degradants (eg, trifluralin, oryzalin, amiprophosmethyl) to produce polyploids;

- seed dormancy factors;
- pests and diseases (eg, crown rot, spring sickness, bulb mites, gall midge, daylily rust).

The grants are up to \$3,000 per year. Grants are renewable for a total of three years.

Closing date: 01 Apr 13

ALL FOR PROPOSALS

Prince Bernhard Fund for Nature - Prins Bernhard Natuurfonds

Description:

The Prince Bernhard Fund for Nature invites applications for financial support. The mission of this fund for nature is to support small, preferably local initiatives towards the conservation and wise use of nature and the natural resource base. The fund primarily focuses on work undertaken by organisations located in the fund's focal regions: Africa, Asia and Latin America. Organisations from other regions may qualify for support if there is a substantial element of partnership with, strengthening of, local organisations. Grants do not exceed €25,000. Due to this limited nature of funding, the fund prefers to act as a catalyst for larger initiatives and link its project support as much as possible to larger themes and organisations.

Closing date: 01 Apr 13

Deadline information: Deadlines on: 1 April 2013, 1 October 2013, and repeated annually.

ESEARCH AND PREVENTION PROJECT GRANTS

International Society of Nephrology

Description:

The International Society of Nephrology invites applications for its research and prevention project grants. The aim is to fund kidney research that it is relevant for people in developing countries. The following activities may receive support:

- screening and intervention studies: identifying the individuals at high risk for or with chronic kidney disease by screening programmes. This should be followed up by health education, lifestyle modification and pharmacological treatment in order to reduce end stage kidney cardiovascular disease and mortality;
- clinical research studies addressing specific local needs: performing small clinical research projects aimed to address specific needs at regional or country level related to acute and chronic kidney disease.

The project co-ordinator must be a member of ISN and the project must be conducted in the developing world. The budget for each proposal should not exceed US\$15,000.

LF NACHEMSON EVIDENCE BASED MEDICINE GRANT

Scoliosis Research Society

Description:

The Scoliosis Research Society invites applications for its Alf Nachemson evidence based medicine grant grant. These awards are given to studies that aim to provide the best available evidence by which to improve our knowledge and practice in the care of patients with spinal deformities. Applicants do not need to be members of the society to apply. These applications require evidence that the investigator has the appropriate experience and resources.

The society has identified the following areas as important research topics:

- evidence based medicine;
- idiopathic scoliosis;
- aetiology;
- non-op and operative treatment;
- 3D deformity of the spine and thorax;
- adult deformity;
- treatment and outcomes;
- osteoporosis, particular in osteoporotic spine fractures, kyphosis impact scoliosis on management, and how it relates to

deformity and spinal instrumentation;

- early onset scoliosis treatment;
- sagittal imbalance;
- congenital scoliosis;
- neuromuscular spinal deformity;
- deformity and reconstruction arising from spine and sacral tumour treatment;
- thoracic insufficiency associated with spinal deformity in children;
- pulmonary outcome sequeallae following common natural history of spine deformity and treatment history.

This grant is awarded a maximum of US\$25,000 per year for up to two years, the maximum total award being US\$50,000.

Closing date: 01 Apr 13

Deadline information: Deadlines on: 1 April 2013, 1 October 2013, and repeated annually.

EXT-GENERATION NATIONAL NANOTECHNOLOGY **INFRASTRUCTURE** NETWORK (NG NNIN) National Science Foundation

Description:

The National Science Foundation invites applications for its next-generation national nanotechnology infrastructure network (NG NNIN). This programme aims to establish a next-generation national nanotechnology infrastructure network that will build on the existing concept of NNIN with a much broadened scope and user base. The core mission of the network has included national-level education and outreach programmes to enable a diverse science and engineering workforce, the study of societal and ethical implications of nanotechnology, including issues of environment, health and safety, as well as important modelling and simulation capabilities.

Academic institutions in the US are eligible to submit or participate in proposals. Nonacademic US institutions or organisations, including national laboratories and private sector companies, as well as non-US institutions, may participate in network activities using their own resources.

The NSF intends to support a single national network for a period of five years. Approximately US\$16 million is available to fund the network each year, while individual institutions within the network are limited to receiving a maximum of US\$2.5m per year. NSF 13-521.

Closing date: 01 Apr 13 Deadline information: Letters of intent due by 5pm proposer's local time, 1 April; full

proposals due by 5pm proposer's local time, 13 May 2013.

THICS AND SOCIETY DOCTORAL STUDENTSHIPS Wellcome Trust

Description:

The Wellcome Trust invites applications for its ethics and society doctoral studentships. These enable scholars to undertake full-time research on a topic related to the ethics and society programme, leading to a doctoral degree at a university in the UK, the Republic of Ireland, or a low- or middle-income country.

Strong preference is given to applicants intending to make a long-term academic career in the subject or area. Applicants would normally be expected to hold a master's degree or equivalent in a subject relevant to the aims of the ethics and society programme.

Studentships are for a period of up to three years and cover the student's stipend, university and college fees, travel, equipment and research expenses. Fees at the overseas rate will only be considered for applicants who are from low- or middle-income countries.

Closing date: 02 Apr 13

NNUAL GRANT COMPETITION (FORMERLY UNSOLICITED GRANTS)

United States Institute of Peace

Description:

The US Institute of Peace invites applications for its annual grant competition. These are open to any project that falls within the institute's general mandate that focuses on preventing, managing, and resolving violent conflict and promoting post-conflict peace building outside the borders of the US. Unsolicited grants are offered across a broad range of relevant disciplines, skills, and approaches. Topic areas of interest to the institute include, but are not limited to:

- conflict analysis and prevention;
- mediation and conflict resolution;
- post conflict peace and stability operations;
- religion and peacemaking;
- women and girls in conflict and peacebuilding;
- rule of law and transitional justice;
- economies and conflict;
- social, psychological, and physical impacts of war and conflict;
- media and conflict.

Most USIP grants are one to two years in duration. Most awards fall in the range of \$50,000 to \$120,000. USIP may provide grant support to both US and foreign non-profit organizations and individuals.

ILOT RESEARCH GRANTS National Multiple Sclerosis Society

Description:

The National Multiple Sclerosis Society invites applications for its pilot research grants. These short-term grants support unique and novel ideas with the potential to open significant new areas of research on multiple sclerosis. Projects that are simply extensions of ongoing research or that already have ample supporting data will not be considered.

Investigators established at research institutions may apply to the programme, although funding will not be granted for postdoctoral fellows or graduate students. The principal investigator need not be a US citizen.

Grants are worth up to US\$40,000 in indirect costs for a period of one year. The grantee institution, if located in the US, may add an additional amount of up to 10 per cent to the requested sum.

Closing date: 03 Apr 13 Deadline information:

OYAL SOCIETY/DFID AFRICA CAPACITY-BUILDING INITIATIVE - SCIENTIFIC NETWORK AWARDS Royal Society

Description:

The Royal Society and the Department for International Development applications for the Africa capacity-building initiative - scientific network awards. These support the development of collaborative research consortia between scientists in sub-Saharan Africa and a research institution in the UK. The overall aim of the scheme is to strengthen the research capacity universities and research institution in sub-Saharan Africa. The awards will enable applicants to prepare a joint proposal for a five-year programme grant.

The initiative concentrates on the following three research areas:

- water and sanitation, including water engineering and irrigation, and waste water management;
- renewable energy, including solar, wind, and hydro-energies, as well as energy capture and storage;
- soil-related research, including soil properties, degradation, nutrients, crop-soil interface, and soil and crop management.

Funding supports the establishment of research consortia between one UK-based applicant and researchers based in at least two, but preferably three, different sub-Saharan African countries. Consortia should be multidisciplinary.

UK applicants must have completed a PhD or have equivalent experience, be resident in the UK and hold a contract in an eligible institution, which include UK universities and not-for-profit research organisations.

African co-applicants must be postdoctoral or have equivalent experience, be citizens of a sub-Saharan country and hold a contract in eligible institution, which include universities and organisations in any sub-Saharan African country. Each application must have three African principal investigators, no two of which can be based in the same organisation.

The Royal Society will fund 20 awards worth up to £25,000 each. Up to £5,000 of the total award can be used to cover research consumable expenses.

Closing date: 04 Apr 13 Deadline information: Posted date: 07 Nov 12

NCREASING HIV/AIDS PROGRAMME CAPACITY THROUGH HUMAN RESOURCES CAPACITY BUILDING TO SUPPORT THE TRANSITION OF THE KENYA HIV TO LOCAL ORGANISATIONS UNDER **PROGRAMME** THE PRESIDENT'S EMERGENCY PLAN FOR AIDS RELIEF

Centers for Disease Control and Prevention (CDC)

Description:

The Centers for Disease Control and Prevention invites applications for increasing HIV/Aids programme capacity through human resources capacity building to support the transition of the Kenya HIV programme to local organisations, under the President's Emergency Plan for Aids Relief. The long term goals of the project are as follows:

- to increase the number of experienced healthcare workers with knowledge, skills, and abilities to lead and manage efficient and effective HIV programmes in Kenya;
- to increase the number of highly skilled healthcare workers through

- the short-term capacity programmes to deliver quality services at local organisations;
- to improve the ability of organisations participating in the programme to effectively manage the HIV response in Kenya.

US and non-US entities may apply. Funding is worth up to US\$2 million for the first year of the programme. The project should last five years. Ref: CDC-RFA-GH13-1309

EARSALL FELLOWSHIP IN NAVAL AND MARITIME HISTORY *Institute of Historical Research*

Description:

The Institute of Historical Research invites applications for the Pearsall fellowship in naval and maritime history. This supports a one-year postdoctoral research fellowship in naval and maritime history in the broadest sense, anywhere in the world, from the fall of the Roman Empire in the west up to the present day.

Fellowships are tenable at the institute. Fellows will not be required to reside in London, but should participate in the activities of the institute.

This fellowship is intended as a first academic post for recent doctoral graduates. Applicants must already have submitted their doctoral thesis for examination, or be prepared to do so by 1 October of the academic year in which the award is to be held. Applicants who already hold doctorates must have been awarded them in the five years prior to October 2013. Applicants may be of any nationality, and their PhD may have been awarded in any country.

The stipend will be £22,000 for a full academic year.

Closing date: 05 Apr 13

Deadline information: **Applications** accepted between 1 February and 5 April 2013. This call is repeated once a year.

ULBS AND OUTDOOR FLOWERS R&D Horticultural Development Company

Description:

The Horticultural Development Company invites applications for its bulbs and outdoor flowers research and development strategy. Under this scheme, R&D projects relating to bulbs and outdoor flowers will be supported. The sector encompasses daffodil bulb and flower production, forced bulbs, other bulb crops such as tulips and gladioli, and outdoor cut flowers and foliage.

Consultation with the cut flower industry has highlighted a number of new and challenging areas of research, including market research into understanding customer trends, finding new treatments to prolong shelf life without the use of chemical pesticides and the endeavour to reduce high labour costs. The bulb and outdoor flower industries are continually searching for new technologies that will enable them to remain economically viable and environmentally friendly in the future.

NTERNATIONAL RESEARCH SCHOLARSHIP

University of Aberdeen

Description:

The University of Aberdeen, under the Wellcome Trust strategic award medical fungal immunology mycology and consortium, invites applications for its international research scholarships. Up to four scholarships are available for students from low- and middle-income countries, enabling them to complete a one-year master's degree in medical mycology and fungal immunology at the University of Aberdeen during the first year of their scholarship, and then move on to a three-year PhD research project at a UK higher education institution, taking part in the consortium.

Each applicant must be nominated by a sponsor, representing a sponsor institution from the applicant's home country.

The award will include international tuition fees, a maintenance stipend, student visa costs and research expenses for four years.

EWTON INTERNATIONAL FELLOWSHIPS

Royal Society

Description:

The Royal Society, in partnership with the British Academy, invites applications for the Newton international fellowships.

scheme enables early-stage postdoctoral researchers from all over the world to work at UK research institutions for a period of two years. The scheme supports research in

the physical, natural and social sciences, and the humanities. Fellowships must start in January 2014 and be held at a UK host organisation for the two-year period.

Applicants should have completed a PhD and should have no more than seven years of active postdoctoral experience or be in the final stages of their PhD at the time of application. All applicants must be working and be based outside the UK. Applicants who completed their PhD at a UK institution must have been working and based outside the UK for at least one year. Individuals who have not previously studied or worked in the UK are particularly encouraged to apply. Contact between the applicants and their UK sponsor must have been established prior to application.

Funding consists of £24,000 per year for subsistence costs, up to £8,000 per year for research expenses and a one-off payment of up to £2,000 for relocation costs. Fellows may also be eligible to receive up to £6,000 annually for up to 10 years following completion of the fellowship to support networking activities with **UK-based** researchers.

Closing date: 10 Apr 13

Deadline information: Applications should be submitted for approval to the UK host organisation approver by 3 April 2013. This call is repeated once a year.

CTION GRANTS FOR THE PREVENTION OF, AND FIGHT AGAINST, CRIME -TARGETED CALL

Directorate-General for Home Affairs

Description:

The Directorate-General for Home Affairs invites proposals under its targeted call for action grants for the prevention of, and fight against, crime. Funding will provide up to 90 per cent of eligible costs for actions on the following priorities:

- measures to set up passenger information units in member states for the collection, processing, analysis and exchange of Passenger Name Record data;
- the use of the PNR data should be the prevention, detection, investigation and prosecution of terrorist offences and serious crime;
- measures to obtain the PNR data only from air carriers and only for international flights;
- measures to ensure that the data are not retained by the passenger information unit in the central database of the member state for a period longer than five years;
- measure to ensure that strict data security should be applied to the data, both for the protection of the database itself and through measures to limit and monitor the access to the
- measures to ensure that passengers can make full use of their data protection rights;
- measures to ensure that the passenger information unit is able to carry out risk assessment of passengers on the

- basis of the PNR data prior to their arrival or departure;
- measures to ensure that the passenger information unit is able to cooperate with other authorities responsible for prevention, detection, investigation and prosecution of terrorist offences and serious crime in member states.

Bodies and organisations with legal person status, established in EU member states, may apply. Transnational projects must involve co-beneficiaries in at least two member states. National projects must prepare transnational projects or union actions, or complement transnational projects or union contribute to methods actions, or technologies potentially transferable actions at Union level. Entities established in third-countries, international organisations and EU agencies may participate on a noncost basis.

Available budget for this call is €50 million over a period of maximum 24 months.

<u>UCERIUS PHD SCHOLARSHIPS IN MIGRATION STUDIES</u> Zeit-StiftungEbelin und GerdBucerius

Description:

The Zeit-StiftungEbelin und GerdBucerius invites applications for the Bucerius PhD scholarships in migration studies. These are awarded to six to eight PhD students researching migration in changing societies. Research applications on migration in and to the Global South are particularly welcome. The following topics are especially encouraged:

- changing migration patterns in and to the Global South;
- challenges of incoming migration in developing countries;
- reception of immigration in destination countries - policies and discourses;
- migration and citizenship legislation;
- remittances, their costs and effects;
- migration and social development;
- internal migration, urbanisation and the social change.

Applicants must be PhD students of social sciences. A monthly stipend of €1,200 is available for one to three years. Additional funds for special research needs are available.

Closing date: 11 Apr 13

Deadline information: **Applications** accepted between March and 11 April 2013.

This call is repeated once a year.

Fax: +46 8 666 9557

Email: info@promobilia.se

Description:

The Wellcome Trust invites applications for its pathfinder awards. These offer pilot funding for academic-industry partnerships to support early-stage applied research and development projects in the areas of orphan and neglected diseases. The awards facilitate requests that would normally be considered too early for funding under the Wellcome Trust's other translational funding schemes. They might be used to support the clinical development of any products, including drugs, biologics, medical devices, enabling technologies and vaccines. The focus of the scheme is orphan and neglected diseases where no current therapy exists or where the proposed product will be superior to the existing options.

Projects must address an unmet need in a neglected or orphan disease. The proposed project should aim to build credible assets that would be competitive to attract further investment by the company or funding schemes provided by technology transfer. Applications should establish or build on a partnership between a public sector applicant from either an academic or a not-for-profit entity and an industry partner.

The industry partner needs to demonstrate it has the means to support the research through to a credible exit. Evidence that the company has previously developed and subsequently taken to market one or more product lines arising from its own research and development is required.

The lead applicants should normally hold a position of responsibility within the eligible organisations. Postdoctoral research assistants are eligible for co-applicant status if they make a significant contribution to a research proposal and have agreement from their funding agency.

The project duration will be a maximum of 18 months. The Wellcome Trust's contribution to the partnership will be capped at £100,000. Evidence of a matching funding contribution from the company partner is expected.

Closing date: 12 Apr 13 (Forecast)

Deadline information: !! Call has not yet been announced by sponsor but this is the approximate deadline we expect. This call is repeated 4 times a year.

TARGETS AND MECHANISMS AT THE INTERFACE OF PANCREATIC ISLETS AND THE IMMUNE SYSTEM - CONCEPT GRANTS

Juvenile Diabetes Research Foundation International

Description:

The Juvenile Diabetes Research Foundation International and the Helmsley Charitable Trust invite applications for their concept grants under the targets and mechanisms at the interface of pancreatic islets and immune system scheme. These are intended to enable study of a specific novel question or develop data to support a developing concept that has little or no preliminary data.

The scheme aims to identify and validate targets and mechanisms acting at the isletimmune interface prevent, progression of, or treat type 1 diabetes.

Projects are expected to generate knowledge and insights enabling the development of novel therapeutic strategies to affect the course of T1D. Moreover, this RFA supports research programmes with performancebased milestones that are aimed identifying and validating druggable targets or pathways within islets that act at the isletimmune interface. Pathways or targets with the potential to both alleviate the immune attack and promote beta cell health are of special interest, while the inclusion of studies with human immune cells and human islets or beta cells is strongly encouraged.

Investigators from fields other than T1D with novel concepts of how cells could participate autoimmune-mediated their own destruction are highly encouraged to apply. Similarly, investigators who have identified such mechanisms in other autoimmune settings and wish to extend those findings into T1D are also encouraged to apply.

Applications may be submitted by public or private non-profit organisations. Applicants must hold an MD, DMD, DVM, PhD or equivalent academic degree, and a faculty position or equivalent at a college, university, medical school or a comparable institution.

Budgets are limited to US\$150,000 including 10 per cent indirect costs for a period of up to 12 months.

ELCH FOUNDATION SCHOLARSHIP

International Union for Vacuum Science, Technique and Applications

Description:

The International Union for Vacuum Science, Technique and Applications applications for the Welch Foundation scholarship. A scholarship is offered to a promising scholar who wishes to study vacuum science and techniques or their application in any field. The winner of the competition will spend a year in a research laboratory in another country.

Candidates should have at least a bachelor's degree; a doctoral degree is preferred. The laboratory in which they wish to conduct research must be outside their native country and preference will be given to applicants who propose study in a foreign lab in which they have not yet studied.

The scholarship is awarded for a one-year period, starting on 1 September. The award amount is approximately US\$15,000.

OHN F PERKINS JR MEMORIAL AWARD FOR INTERNATIONAL PHYSIOLOGISTS

American Physiological Society

Description:

The American Physiological Society invites applications for the John F Perkins Ir memorial award for international physiologists. The award promotes cultural exchange and scientific collaborations by providing supplementary aid to families of foreign scientists working for a minimum of three months in the US. In this way, young scientists are able to bring their families and thus make full use of the cultural exchange as well as the scientific benefits associated with an international collaboration. The award will support family visits to the US for postdoctoral fellows and junior faculty from overseas.

The programme presupposes that the visiting scientist and their host already have made arrangements for scientific collaboration and have sufficient funds to cover the needs of the visiting scientist. The application must be made jointly by the host and the visiting scientist. The host must be an APS member.

The recipient receives funds generally not exceeding US\$5,000.

Closing date: 15 Apr 13

Deadline information: Deadlines on: 15 April 2013, 15 October 2013, and repeated annually.

ESEARCH GRANTS Osteosynthesis and Trauma Care Foundation

Description:

The Osteosynthesis and Trauma Care Foundation invites applications for its research grants. The objective is to encourage investigators by providing seed and start-up funding for promising research projects in the field of orthopaedic trauma surgery. The general topic area will be functional assessment of fracture healing.

Both laboratory and clinical projects are suitable, but in either case clinical relevance must be explicitly and clearly described. A trauma or orthopaedic surgeon must serve as either the principal or co-principal Non-trauma investigator. and orthopaedic surgeons, MDs, PhDs or DVMs may serve as the principal or co-principal investigator as long as they are affiliated with a trauma or orthopaedic department with an orthopaedic surgeon as the co-principal investigator.

Grants are worth up to US\$50,000 for a research project extending over a maximum of two years.

RASMUS MUNDUS ACTION TWO PARTNERSHIPS

Education, Audiovisual and Culture Executive Agency

Description:

The Education, Audiovisual and Culture Executive Agency invites proposals for action two of the Erasmus Mundus programme. Projects will foster structured cooperation between European and third-country higher education institutions through the promotion of mobility at all levels for students, candidates, researchers, academics administrative staff. Strand one fosters partnerships between countries covered by the ENPI, DCI, EDF, and IPΑ instruments, while strand two fosters between partnerships countries and territories covered by the industrialised countries instrument.

Collaborations between EU. EFTA Western Balkan institutions and those in the South Mediterranean region, Eastern Europe and Russia, the Western Balkans, Iran, Iraq and Yemen, Central Asian Republics, Asia Regional, India, the Latin American region, South Africa or Africa, Caribbean and Pacific countries are eligible.

Each partnership must consist of at least five HEIs having been awarded an Erasmus Charter from at least three EU states and HEIs from the third countries targeted in this call. Each partnership may include a maximum of 20 partners.

A suspensive clause is in place pending confirmation of Commission decisions for Brazil and Tunisia.

From 1 July 2013, Croatia will join the EU, and should be considered as European for this call. The overall budget for this call is approximately €194.16 million, to fund a minimum mobility flow of 6,877 individuals. EACEA 38/12.

EACEA BOUR 02/29 Avenue du Bourget 1 1040 Brussels

ACULTY RESEARCH AWARDS PROGRAMME

Description:

Google invites applications for its faculty research awards programme. This supports academic research in computer science, related engineering and fields. The programme funds research at universities, facilitates interaction between Google and academia, and supports projects whose output will be made openly available in the research community. Proposals must address one of the following research interests:

- economics and market algorithms;
- education innovation;
- geography and maps;
- human-computer interaction;
- information retrieval, extraction and organisation;
- machine learning and data mining;
- machine perception;
- machine translation;
- mobile:
- natural language processing;
- networking;
- policy and standards;
- privacy;
- security;
- social networks;
- software engineering;
- speech;
- data database structured and management;
- software and hardware systems.

Full-time faculty members from universities worldwide may apply. Applicants must be assistant, associate or full professors, or faculty members at professorial level of seniority. Awards are worth a maximum US\$150,000, but the median award amount is approximately US\$50,000 to US\$60,000. Most awards are funded at the amount needed to support basic expenses for a graduate student for one year. Each funded project will be assigned a Google sponsor.

Closing date: 15 Apr 13

Deadline information: Deadlines on: 15

April 2013, 15 October 2013.

Posted date: 23 Oct 12

Award type: Directed grants to institutions, research groups etc, Directed grants for individual investigators, Innovation grants,

Networking/collaboration Award amount max: \$150,000

IGRID JUSELIUS SENIOR FELLOWSHIP Sigrid Jusélius Foundation

Description:

The Sigrid Juselius Foundation invites applications for its senior fellowship. The foundation awards an annual fellowship for medical science research conducted outside Finland. The foundation awards grants to one or two senior medical researchers with a funding for six to 12 months. The fellowship is not applicable to ongoing research abroad. Funding is meant to cover all the travel, operational and maintenance Fellowship amounts range from €50,000 to €80,000.

NVIRONMENTAL POLITICS **INSTITUTE: CLIMATE** CHANGE **AND ▼** ENVIRONMENTAL GOVERNANCE IN AFRICA

■ Council for the Development of Social Science Research (CODESRIA)

Description:

The Council for the Development of Social Science Research invites applications for participation in its environmental politics institute climate change on environmental governance in Africa. The institute, to be held in Dakar, Senegal from 6 to 18 August 2012, will bring together African scholars undertaking innovative research on topics related to the broad theme of environmental politics to promote and sustain the development of coherent social sciences engagement with environmental issues in Africa. The main objectives are to:

- build the capacity of young African scholars in social science research into environmental politics issues;
- catalyse the development of a core community epistemic of social scientists engaged with environmental issues;
- encourage the sharing of experiences among researchers, activists and policymakers from different disciplines, orientations and geographical and linguistic zones;
- promote and enhance a critical interdisciplinary engagement in a manner that allows Africans to effectively identify and tackle the environmental issues of the continent;
- foster the participation of scholars in discussions and debates about the environment taking place in Africa, especially in the context of the global climate change discourse.

Participants will be required to prepare a research paper to be presented during the course of the institute. Applications are sought for the positions of director, resource persons and laureates. The director will be a senior scholar known for his or her expertise and originality of thinking on the topic. Resource persons will be senior or mid-career scholars who have published extensively on the topic and can make a significant contribution to debates. Laureates will be African researchers who have completed their university or professional training and have a proven capacity to carry out research on the institute theme. Intellectuals active in the policy process or in social movements or civic organisations are also encouraged to apply. A total of 15 researchers from across Africa and the diaspora will be selected to participate. Non-African scholars who are able to raise funds for their participation may also apply.

Closing date: 15 Apr 13 (Forecast)

P7-ICT-2013-C

European Commission Framework Programme 7 (becoming Horizon 2020): Cooperation

Description:

The European Commission Framework Programme 7: Cooperation invites proposals for its FP7-ICT-2013-C call. Projects may address future and emerging technologies, including ICT.2013.9.1 FET-Open challenging current thinking, ICT.2013.9.2 high-tech research intensive SMEs in FET research, ICT.2013.9.3 FET young explorers and ICT.2013.9.4 international cooperation in FET research.

Actions may take the form of small or medium-scale focused research actions (STREP) and coordination and support actions. Projects must involve at least three independent legal member-state or

associated-country partners, of which no two partners may be established in the same MS or AC.

Each proposer must be based in an EU member or FP7-associated state. Any legal entity, regardless of the country in which it is established, may participate in a Cooperation call.

The indicative budget for this call is €50 million.

Closing date: 15 Apr 13

Zeno Karl Schindler Foundation

Description:

The Zeno Karl Schindler Foundation invites applications for its master thesis grants. These support cutting-edge research by Master's degree students in engineering, environmental sciences and medieval studies. The grant will sponsor the student for the duration of his and her master's thesis. The grant aim to encourage research collaborations between two universities, namely the home university of the master thesis candidate and a hosting university, one of the two should be situated in Switzerland.

The grant consists of a stipend of approximately CHF1,600 per month plus research expenditures for the duration of the master's thesis work.

ESEARCH CAREER ENHANCEMENT AWARDS

American Physiological Society

Description:

The American Physiological Society invites applications for its research enhancement awards. These awards are designed to enhance the career potential of APS regular members. The award can be used to support short-term visits to other laboratories to acquire new specific skills and to support attendance at special courses devoted primarily to methodologies appropriate for both a new investigator and a more senior investigator entering a new field of research.

Awards are worth up to US\$4,000.

Closing date: 16 Apr 13

Deadline information: Deadlines on: 16 April 2013, 15 September 2013, and repeated annually.

AJOR RESEARCH GRANTS Centre for Economic Policy Research

Description:

The Centre for Economic Policy Research, through its private enterprise development in low-income countries initiative, invites applications for its major research grants. These grants will support research that aims to better understand what determines the strength of market forces driving efficiency in low-income countries. Research may relate to firms of all sizes and should produce results that will be useful for policymaking. Proposals should address the following themes:

- modelling market frictions in LICs using newly available data;
- understanding how constraints interact using micro-founded macro models:
- the dynamics of SMEs informality and entrepreneurship;
- the role of export-oriented industries in driving growth.

Proposals that address cross-cutting issues such as fragile and conflict-affected states, gender, and climate, environment and social compliance are encouraged.

Organisations and institutions worldwide may apply. Joint proposals from consortia will be considered provided they have an appropriate legal arrangement. Grants are designed to fund teaching buyouts for principal investigators, research assistance and data collection and surveys in LICs. Grants are worth a minimum of £100,000, with an average grant size of £300,000. There is no upper limit.

Closing date: 16 Apr 13 (Forecast) Deadline information: !! Call has not vet been announced by sponsor but this is the

approximate deadline expect. we Applications due by 5pm GMT. This call is repeated once a year.

P7-ICT-2013-11 European Commission Framework Programme 7 (becoming Horizon 2020): Cooperation

Description:

The European Commission Framework Programme 7: Cooperation invites proposals for its FP7-ICT-2013-11 call. Projects may address the following topics:

- challenge one pervasive and trusted network and service infrastructures, including ICT-2013.1.1 future networks;
- challenge three alternative paths to components and systems, including ICT-2013.3.1 nanoelectronics and ICT-2013.3.2 photonics;
- challenge four technologies for content and languages, including ICT-2013.4.2 scalable data analytics;
- challenge six ICT for a low-carbon economy, including ICT-2013.6.1

- smart energy grids, ICT-2013.6.3 ICT for water resources management;
- challenge eight ICT for learning and access to cultural resources, including ICT-2013.8.2 technology-enhanced learning;
- future and emerging technologies, including ICT-2013.9.9 FET flagship initiatives;
- horizontal actions, including ICT-2013.11.2 more efficient and affordable solutions for digital developed preservation and validated against public-sector needs joint through pre-commercial procurement.

Actions may take the form of small or medium-scale focused research actions (STREP), integrated projects, collaborative projects, collaborative projects for specific cooperation actions with international cooperation partner countries (SICAs) and coordinating and support actions. Collaborative projects, coordination projects, and coordination and support actions must involve at least three independent legal member-state or associated-country partners, of which no two partners may be established in the same member state or associated country. SICAs must involve at least four independent legal entities, of which at least two must be established in different member states or associated countries and two in different ICPCs.

Each proposer must be based in an EU member or FP7-associated state. Any legal entity, regardless of the country in which it is established, may participate in this call.

The indicative budget for this call is €236.5 million.

ORFACE CALL FOR PROPOSALS: WELFARE-STATE FUTURES **ERA-Net NORFACE**

Description:

ERA-Net NORFACE invites proposals under its call on welfare-state futures. Themes to be addressed are:

- people and the welfare state;
- inequalities, diversity and welfare states:
- rethinking the economics of the welfare state:
- the future politics of the welfare state;
- shifting responsibilities for welfare.

Each project team must involve at least three teams of eligible researchers based at

universities or research institutes in three or more NORFACE countries, which are: Austria, Denmark, France, Estonia, Finland, Germany, Iceland, Ireland, the Netherlands, Norway, Poland, Portugal, Slovenia, Sweden and the UK. Researchers from other countries may participate as cooperation partners, but may not apply for NORFACE funding. Teams should strive to include early-career researchers, including postdoctoral and PhD students, and women are particularly encouraged to apply.

Funding is worth up to €1.5 million over a maximum of 36 months.

OLLINGWORTH AWARD National Association for Gifted Children

Description:

The National Association for Gifted Children invites nominations for the Hollingworth award. This award encourages educational and psychological research studies of potential benefit to gifted and talented children.

This international competition is open to individuals, educational institutions and other organizations that present proposals for publishable research projects concerning gifted and talented youth. The research projects may be sponsored by universities, school systems, individual schools, public agencies or private non-profit organizations.

Professors. educational administrators, psychologists, teachers, graduate students or other professional individuals are welcome to apply.

The award consists of a cash grant in two installments.

Closing date: 17 Apr 13 (Forecast)

Deadline information: !! Call has not yet been announced by sponsor but this is the approximate deadline we expect. This call is repeated once a year.

AUREATE RESEARCH GRANT Novo Nordisk Fonden - Novo Nordisk Foundation

Description:

The Novo Nordisk Foundation invites applications for its laureate research grant. The aim is to achieve new scientific directions and breakthroughs within biomedicine and biotechnology. The grant programme encourages leading scientists to come to Denmark to conduct larger and longer-term projects as well as to facilitate collaboration across scientific and geographic borders. Scientists can have any nationality, but should currently be working outside Denmark at a public or private research institution or a commercial organisation. Funding may be utilised for salaries, direct project costs, equipment costs, travel costs and publication costs. The grants programme consists of two grants, each worth up to DKK40 million for a period of up to seven years with the possibility of one period of extension of up to seven years with a limit of 35M in total.

Closing date: 18 Apr 13

₹P7 SP1-JTI-CS-2013-01 CLEAN SKY RESEARCH AND TECHNOLOGY DEVELOPMENT PROJECTS

European Commission Framework Programme 7 (becoming Horizon 2020): Cooperation

Description:

The European Commission Framework Programme 7: Cooperation joint technology initiatives programme invites proposals for its SP1-JTI-CS-2013-01 call on clean sky research and technology development projects. Funding will enable partners to address specific tasks on the following topics:

- JTI-CS-ECO eco-design, for which a maximum of €1.2 million is available to fund seven subtopics;
- JTI-CS-GRA green regional aircraft, for which a maximum of €4.815m is available to fund four subtopics;
- JTI-CS-GRC green rotorcraft, for which a maximum of €2.04m is available to fund four subtopics;
- JTI-CS-SAGE sustainable and green engines, for which a maximum of €16.575m is available to fund 17 subtopics;
- JTI-CS-SFWA smart fixed-wing aircraft, for which a maximum of €2.25m is available to fund two subtopics;
- JTI-CS-SGO systems for green operations, for which a maximum of €7.875m is available to fund 20 subtopics.

Each proposal may be submitted by one or more legal entities based in EU or associated member states. Any legal entity, regardless of the country in which it is established, may participate in a CD-RTD project. The for indicative budget this call approximately €34.8m and funding for each topic will cover between 50 and 75 per cent of eligible costs.

SP1-JTI-CS-2013-01.

Closing date: 18 Apr 13

Deadline information: Applications due by

5pm Brussels time. Posted date: 21 Jan 13

Award type: Directed grants to institutions,

research groups etc,

Networking/collaboration, Innovation grants, Prototypes and demonstrations

Award budget total: €34,755,000

ORDIC CENTRES OF EXCELLENCE WITHIN E-SCIENCE IN HEALTH AND SOCIAL PRECONDITIONS FOR HEALTH Nordforsk

Description:

Nordforsk invites applications for its call on Nordic centres of excellence within e-science in health and social preconditions for health. The aim is to establish up to two Nordic centres of excellence for e-science research on the use of genetic and molecular data and clinical and population registries for research in health and social preconditions for health. This involves development of methods and tools for advanced data integration, data analysis, modelling and simulation for research related to health and social preconditions for health. with a special focus on exploiting national registry, biobank and genetic data in the Nordic countries.

Institutions from at least three Nordic countries must be involved, and the project leader must be an established senior researcher based at a research institution in either Finland, Norway or Sweden. Funding may also be used for collaboration with non-Nordic researchers and research groups.

The total budget for this call is approximately NOK40 million with funding granted for five years.

Closing date: 19 Apr 13

Deadline information: Applications due by

2pm CEST.

Posted date: 29 Jan 13

Award type: Directed grants to institutions, research groups etc,

Networking/collaboration, Research centres

ELTIC-PLUS CALL FOR PROPOSALS *EUREKA*

Description:

Eureka invites proposals for its Celtic-Plus call. Funding supports projects on the following themes:

- get connected, including infrastructure and connectivity, fixed and wireless, optics, energy efficiency, network architecture and autonomic network aspects;
- while connected, including end-toend services and applications, digital home, digital enterprises, digital city, digital school, digital transport, ehealth, security, privacy and identity;
- future internet relations, including plans to complement the future internet programme, making the high-quality internet service platform, introducing the Celtic-Plus

- use case factory and contributing to future internet capacity building and test-cases or platforms;
- green-internet relations, including considering environmental issues in information and communication technologies, encouraging better energy efficiency and developing a multidisciplinary approach.

Each project must involve at least two partners from two different countries. Consortia may include industry, small and medium-sized enterprises, universities and research institutes. Non-Eureka member countries participate where may consortium agrees, though they should not have a major project share. The average budget for a Celtic-Plus consortium is between €2 million and €70m over 24 to 36 months.

ERSONAL SCHOLARSHIPS FOR ENERGY RESEARCH Fortum Foundation - FortuminSäätiö

Description:

The Fortum Foundation invites applications for its personal scholarships. Personal scholarships may be awarded for graduate studies towards a licentiate or a doctorate degree, or for other personal projects related to energy.

The graduate study scholarships may be awarded for studies in Finland or abroad, with up to three years of funding for

licentiate and four years for doctoral degrees available. The annual scholarship amount for study taking place in Finland is €18,000. Additional travel or accommodation funding is available for study taking place abroad. An extra grant for general expenses caused to the host institute is available for all awardees.

The other personal scholarships are paid in a single instalment for the implementation of

an individual project related to foundation's industry. Such a project could be a conference trip relating to the publication of research results, for instance. The amount of the scholarship is not limited in detail, however, it is to be less than the amount for the graduate study scholarships.

Closing date: 23 Apr 13 (Forecast)

Deadline information: !! Call has not yet been announced by sponsor but this is the approximate deadline we expect. Deadline time: 4pm. This call is repeated once a year. Posted date: 19 Apr 12

SITING RESEARCH FELLOWSHIPS - TSUKUBA Japan International Research Center for Agricultural Sciences

Description:

The Japan International Research Centre for Agricultural Sciences invites applications for its visiting research fellowships in Tsukuba. Nine fellowships are available to scholars currently engaged in research relating to agriculture, forestry and fisheries developing countries. Fellows will have the opportunity to conduct collaborative research for the rapid and sustainable development of

agriculture, forestry and fisheries compatible with the preservation of the natural environment. Each applicant should be a national of a developing country, be currently employed by a research organisation or university in their home country and hold a master's degree or higher in a field relating to socio-economics, natural sciences or technology. The fellowships consist of return airfare, a daily living allowance of ¥7,700, arranged housing or a housing allowance and an insurance package. Fellows are required to return to their home countries to carry on their research after the conclusion of this fellowship.

P7 ERC PROOF OF CONCEPT ERC-2013-POC

European Commission Framework Programme 7 (becoming Horizon 2020): European Research Council/Ideas

Description:

The European Commission Framework Programme 7: European Research Council/Ideas invites applications for the European Research Council proof-of-concept grants. Grants enable ERC-funded ideas to be brought to a pre-demonstration stage where potential commercialisation opportunities have been identified. Funds support:

- establishing viability, technical issues and overall direction;
- clarifying intellectual property rights position and strategy;
- providing feedback for budgeting and other forms of exploitation opportunity discussion;
- providing connections to later stage funding;
- covering initial expenses for establishing a company.

Applications are accepted by host institutions in association with principal investigators. All principal investigators benefiting from a recent ERC advanced or starting grant may participate and apply for ERC proof-ofconcept funding. Candidate host institutions must engage the principal investigator for at least the duration of the proof-of-concept activity and must be established in a member state or an associated country. Any type of legal entity may host the principal investigator and their team. ERC actions are open to researchers of any nationality who intend to establish and conduct their research activity in any member state or associated country. Principal investigators may be of any age and nationality and may reside in any country at the time of the application.

The indicative budget for this funding scheme is €10 million, to be divided equally over two rounds. Grants are worth up to €150,000 over 12 months to cover 100 per cent of eligible costs. One proof-of-concept grant will be awarded per ERC-funded project. FP7 ERC-2013-PoC.

Agency for International Development (USAID)

Description:

The Agency for International Development (USAID) invites applications through its leadership initiative for good governance in Africa. The aim of this programme is to promote a culture of good governance and leaders of integrity who eschew corruption in This initiative Africa. focuses strengthening good governance, developing leadership capacity, modelling integrity and promoting accountability, with an emphasis on transparency, oversight mechanisms, representativeness responsiveness, and respect for human rights, and principles of inclusion, participation and public service. Activities should target leaders at any level of government, as well as leaders in civil society, the media and policymaking, and may include:

- exchange programmes;
- extended training, educational programmes or fellowships;
- small grant incentive funds;
- study tours;
- short courses or workshops.

Although there is no specific geographic location for this programme, activities should include participation from multiple countries within sub-Saharan Africa. US and non-US businesses, foundations, NGOs, faith-based, regional and international organisations, and higher education institutions may apply. All applicants must be legally recognised organisational entities under applicable law. Grants are worth a minimum of US\$200,000 and a maximum of US\$1.5 million and will be awarded for between 24 and 60 months. APS-OAA-12-000023.

Closing date: 24 Apr 13

Deadline information: Deadline: concept papers may be submitted at any time and will be reviewed quarterly until 24 April 2013.

Posted date: 26 Apr 12

TUART MORSON SCHOLARSHIP IN NEUROSURGERY

Royal Australasian College of Surgeons

Description:

The Royal Australasian College of Surgeons invites applications for the Stuart Morson scholarship in neurosurgery. The scholarship is designed to assist neurosurgeons within five years of obtaining their fellowship from the college, or neurosurgical trainees, to undertake further research or training in neurosurgery overseas. The scholarship is also open to exceptional young surgeons who are registered to practice neurosurgery in Australia or New Zealand but are not fellows of the college. From time to time, the scholarship may be applied to assist overseas neurosurgeons to spend time in Australia or New Zealand furthering their research in neurosurgery. The value of the scholarship is AU\$30,000 for three to six months.

LAIN BENSOUSSAN FELLOWSHIPS

European Research Consortium for Informatics and Mathematics

Description:

The European Research Consortium for Informatics and Mathematics invites applications for the Alain Bensoussan fellowships. These enable young scientists to spend time at leading European centres outside their own country in order to conduct research in informatics or mathematics. Visits may last for 12 months in one ERCIM institute. A range of topics within the following disciplines are available:

- computer applications;
- computer systems organisation;
- computing methodologies;
- computing milieux;
- data:
- hardware;
- information systems;
- mathematics;
- mathematics of computing;
- software;
- theory of computation;
- other topics.

Researchers from academic institutions and scientists working in industry are encouraged to apply. Each applicant should have obtained a PhD degree during the eight years before the application deadline or be in the last year of the thesis work, having completed the PhD before starting the grant, and must be fluent in English. Travel costs and a monthly allowance or salary are provided.

ESEARCH GRANTS Foundation for the Future

Description:

The Foundation for the Future invites preliminary applications for its research grants to support scholars undertaking research at a macro level that is directly related to better understanding the factors affecting the long-term future of humanity. Applications must pertain to one of four specific subject areas:

- how will global changes in birth rates, mortality rates, reproductive technology affect the human genome over the long-term
- what effect will the current global immigration and emigration of populations have on the demography of the planet over the long-term future?
- what are likely to be the major global driving forces/initiatives/issues for humanity through the new millennium;
- are mechanisms of biological and cultural evolution in sync with our systems of governance and economy? How are they likely to evolve and develop over the long term future?

Awards range from US\$5,000 to US\$25,000. Projects will be funded for a maximum of two years.

Proposals are accepted from unaffiliated individuals or on behalf of individuals or research teams from universities and colleges or non-profit, non-academic organizations.

Closing date: 30 Apr 13 (Forecast) Deadline information: !! Call has not yet been announced by sponsor but this is the

approximate deadline we expect. Preliminary applications April 30, annually; invited full applications, August 1, annually.

ARTH AND SPACE AWARDS **◀** Earth and Space Foundation

Description:

The Earth and Space Foundation invites applications for its Earth and space awards. The foundation offers five awards each year for expeditions that have helped deepen the connection between environmentalism and the exploration of space. Typical areas of interest include:

- environmental projects using technologies resulting from space exploration;
- use of data from extraterrestrial help expeditions further understanding of the Earth's environments and the biosphere;
- effects of the space environment and space exploration on the Earth;
- field work related to astro- and exobiology;
- field research applying the Earth's environmental and biological resources towards human exploration and settlement of space;
- astronomy at the interface between Earth and space exploration or astroarchaeology;
- educational field trips or projects that improve public understanding of the links between environmental and space exploration.

Eligible projects include university expeditions, and expeditions by private, nonprofit or government organisations. Awards are worth £250 or \$500 each.

ISITING SCHOLARSHIP European Society for Paediatric Endocrinology

Description:

European Society for Paediatric Endocrinology invites nominations for its visiting scholarships. These enable ESPE members or their collaborators to gather information and experience on a specific research issue or on a laboratory technique in the field of paediatric endocrinology. Four scholarships, worth €2,500 each, available. The scholarship covers travel and housing expenses only. It excludes research materials or costs and personal living expenses. Grants may also be used to finance

a short-term visit, lasting for up to six weeks, to an external research institution, or a visit of an outside expert in order to receive essential guidance, consultation or advice at the requester's home institute. Non-members may apply, but ESPE members will be given priority.

Closing date: 30 Apr 13

Deadline information: Deadlines on: 30 April 2013, 31 July 2013, 31 October 2013, 31 January 2014, and repeated annually.

ONTRIBUTION OF MULTISENSORY COMPONENTS TO STRUCTURED-LANGUAGE READING INSTRUCTION

International Dyslexia Association

Description:

The International Dyslexia Association invites applications for its multisensory instruction grants. The purpose is to stimulate scientific study of the value of multisensory instruction in teaching reading, particularly for students at risk of academic failure or underachievement, such as those with dyslexia. The association provides funding for new educational, neuroscience, cognitive science, or other research projects with this focus.

Faculty or affiliates, such as graduate students or clinicians, at universities, educational, medical and other non-profit research institutions are eligible. The program is open to all nationalities. The grant is worth up to US\$20,000 for a period of one year.

Closing date: 30 Apr 13 (Forecast)

OODWISDOM FOURTH JOINT CALL PREANNOUNCEMENT ERA-Net WoodWisdom-Net 2

Description:

The WoodWisdom-Net invites applications for its fourth transnational joint call.

Proposals may address the whole forestbased value chain in one of the following areas:

- sustainable management of forest resources:
- efficient utilisation of forest resources in industrial processes;
- value-added products;
- competitive customer solutions.

Proposals may be submitted by transnational consortia of industry, small and mediumsized enterprises, stakeholder associations and research organisations.

Proposals from multidisciplinary groups of researchers are particularly encouraged as well as participation of commercial and industrial partners - especially small and medium-sized enterprises.

Partners from third countries may be included in the consortium if they finance their activity from other sources.

The indicative total budget is €24 million.

Closing date: 30 Apr 13 (Forecast) Deadline information: !! Call has not yet been announced by sponsor but this is the approximate deadline we expect. Preproposals accepted between 6 February 2013and 30 April 2013; full proposals between 17 June 2013 and 24 September

OST-PHD RESEARCH GRANTS Wenner-Gren Foundation for Anthropological Research

Description:

The Wenner-Gren Foundation for Anthropological Research invites applications for its post-PhD research grants. There are awarded to support individual research projects on anthropology. Two types of grants are available:

- the postdoctoral research grants, worth up to US\$20,000 each, support research that demonstrates a clear link to anthropological theory and debates and promises to make a solid contribution to advancing these ideas;
- the Osmundsen initiative grants, worth up to US\$25,000 each, support projects that potentially make a contribution to broader social or intellectual issues, and demonstrate the unique perspective anthropology to understanding brings concerns.

There is no preference for any methodology, research location, or subfield. Preference is given to proposals that employ a comparative perspective, generate innovative approaches or ideas, or integrate two or more subfields.

Researchers with a PhD degree or equivalent of institutional regardless country affiliation, of residence nationality. There is no time limit on the duration of the grant and funding may be requested to cover distinct research phases.

Closing date: 01 May 13

Deadline information: Deadlines on: 1 May 2013, 1 November 2013, and repeated

annually.

UNT POSTDOCTORAL FELLOWSHIPS Wenner-Gren Foundation for Anthropological Research

Description:

The Wenner-Gren Foundation Anthropological Research invites applications for the Hunt postdoctoral fellowships. These support early career investigators with the writing-up of already completed research in anthropology. There is no preference for any methodology, research location, or subfield; however, the supported research should demonstrate a clear link to anthropological theory and debates and promise to make a solid contribution to advancing these ideas. Preference is given to proposals that employ a comparative perspective, generate innovative approaches or ideas, or integrate two or more subfields.

Applications are welcome from scholars who have held their PhD for no longer than 10 years. Applicants can apply regardless of institutional affiliation, country of residence or nationality.

Up to eight fellowships, each of which provides up to US\$40,000, are awarded annually to support periods of up to 12 months.

Closing date: 01 May 13

Deadline information: Deadlines on: 1 May 2013, 1 November 2013, and repeated annually.

ESEARCH GRANTS International Retinal Research Foundation

Description:

The International Retinal Research Foundation invites applications for its research grants programme. Grants support scientific research on the diseases of the human eye, especially its centre, the macula, peripheral and retinal research ultimately will accelerate the outcome of discovery. Specific consideration will be given to those scientists who are actively working toward discovering the causes, prevention, of and cures macular degeneration and diabetic retinopathy.

Grants will only be awarded to non-profit organisations. Principal investigators must have primary faculty appointments at instructor level or higher. Postdoctoral researchers may serve as co-investigators, and postdoctoral fellowship funding may be approved for individuals with a terminal degree who have opted to pursue training in vision research.

Projects will be funded for periods of one year up to US\$100,000. Renewals may be considered.

Closing date: 01 May 13

Deadline information: Grant applications May; postdoctoral scholar nominations due 1 March annually. This call is repeated once a year.

ESEARCH GRANTS National Rosacea Society

Description:

The National Rosacea Society invites applications for its research grants programme. This programme offers research grants of US\$10,000 to US\$25,000 to encourage and support scientific investigation into the potential causes and other key aspects of rosacea that may lead to improvements in its treatment and potential prevention or cure. High priority is given to research in such areas as pathogenesis, progression, mechanism of action, cell biology and potential genetic factors of this conspicuous and often life-disruptive condition. Studies may also be funded in such areas as epidemiology, predisposition, quality of life and associations with environmental and lifestyle factors.

The program is supported by donations from individuals, and funds are available to researchers worldwide.

Closing date: 01 May 13

Deadline information: This call is repeated

once a year.

ROJECT SUPPORT GRANT British Society for Neuroendocrinology

Description:

The British Society for Neuroendocrinology invites applications for its project support grants. These are designed to provide support for consumables and other research costs to enable postdoctoral scientists or students to carry out neuroendocrine research projects. The scheme is primarily intended to support PhD studentships, although it will also provide resources for MRes. Applicants must be academic or faculty staff and the principal supervisor of the student project. Applicants must have been a full member of the society for at least six months. Previous recipients of funding are eligible to apply. Non-UK based members are also eligible to apply. Students must also be members of the society. Up to 12 awards worth a maximum of £5,000 each are available each year.

Closing date: 01 May 13

Deadline information: Deadlines on: 1 May 2013, 1 August 2013, 1 November 2013, 1 February 2014, and repeated annually.

NDP RENEWABLE ENERGY CHALLENGE Nesta

Description:

Nesta, in association with the United Nations Development Programme, invites applications for its renewable energy challenge. The challenge is to design and develop a sustainable cost-effective solution for a stand alone, off-grid renewable energy supply that can produce an average of 1,25 kWh and 120 litres of hot water a day to cover the needs of an average returnee family in rural areas of Bosnia and Herzegovina that will not cost more than €5,000. The solution should meet the following requirements:

- designed as a stand alone kit that can cover the electrical and hot water consumption needs of one average family;
- have autonomy of at least three days;
- modular, scalable and packaged in a suitable way to install and deliver to rural areas;
- assembly does not require any special skills or training;
- assembly instructions are clearly described and understandable;
- if specialised tools are required for assembly, they are included;

- simple and robust enough to operate on a daily basis with minimal maintenance and running costs;
- meets all the relevant EU technical standards and requirements;
- takes in consideration and makes the best of the geographical, weather and climate conditions in the area.

The challenge is open to anyone over the age of 18 who can engineer a complete solution, produce it in sufficient quantities and deliver it within expected timelines.

The winner will receive a US\$20,000 cash prize. In addition, UNDP Bosnia and Herzegovina will pilot the solution for up to 50 returnee families, and the market potential for the winner will be significant.

Closing date: 01 May 13

ESEARCH GRANTS Progeria Research Foundation

Description:

The Progeria Research Foundation invites proposals for its research grants. These support investigators seeking to conduct research to find the cause, treatment or cure for Hutchinson-Gilford Progeria Syndrome. Three types of grants are available:

- innovator awards, worth up to US\$75,000 per year for two years, allow investigators to embark on new lines of investigation, and to produce enough preliminary data to be competitive for longer term funding by other agencies;
- established investigator awards, worth up to US\$100,000 per year for a maximum of three years, support senior investigators established in the field of progeria, or in a field directly applied to progeria;
- specialty awards, the length and budget of which are flexible, support

smaller, technology-driven more projects and preparation antibodies.

Principal investigators hold must postdoctoral positions or beyond. Awards will be granted only to applicants affiliated with institutions with 501(c)(3) status, or the equivalent for foreign institutions.

Closing date: 03 May 13

Deadline information: Applications due six weeks before the June and December board meetings.

Posted date: 18 Jan 13

EALTH INNOVATION CHALLENGE FUND Wellcome Trust

Description:

The Wellcome Trust, in partnership with the Department of Health, invites applications for its health innovation challenge fund. This aims to stimulate the creation of innovative healthcare products, technologies interventions facilitate their and to development for the benefit of patients in the NHS and beyond.

Applications for funding are invited for projects that address one or several of the following areas of special interest:

- 0512-1a clinical applications of genetics;
- 0512-2a - early detection diagnosis of chronic diseases;
- 0512-3a minimising the impact of trauma and serious injury;
- 0512-4a informing clinical management through software-based analysis of complex datasets;

0512-5a - repurposing of medicines and medical devices.

Projects must have already demonstrated principle, supported proof experimental and, where feasible, in-vivo data. Early-stage research or basic science projects will not be supported. Projects must complete first testing in man within the duration of the project and deliver an innovative healthcare solution within five years where the potential benefit has been demonstrated in patients. Proposals must include a commercial strategy that takes into the regulatory pathway, account management, commercial barriers, health economics and routes to market.

The lead organisation must be UK based. Collaborating entities may be non-UK organisations. The following types of organisation are eligible for funding: stock market listed or privately owned companies; **SMEs** and start-up companies; organisations and equivalent UK authorities; universities, research institutes and not-forprofit organisations. Collaboration between two or more of the above is eligible and actively encouraged.

Each biannual funding round is worth £10 million and projects will typically last three years.

Closing date: 03 May 13

Deadline information: Deadline: preliminary applications 5pm, 14 May 2012, 3 September 2012, 3 May and 2 September 2013; invited full applications 5pm, 10 September 2012, 11 January 2013, 9 September 2013 and 9 January 2014.

ORLDWIDE CONTINUATION GRANTS People's Trust for Endangered Species

Description:

The People's Trust for Endangered Species invites applications for its worldwide continuation grants. Funding is available for continuation work on a conservation or research project begun through a previous PTES small grant. These grants are designed to enable some longer-term investment in the most promising areas and must include some practical conservation work. They are not available for first-time applicants or new projects. Applications are welcomed from scientific researchers and workers in the field of conservation. Applicants should already be working and established in either the UK, UK overseas territories or any country not classified by the World Bank as high-income. For applications for work outside the UK, preference will be given to those from, or projects carried out in, regions or countries that have fewer avenues of funding open to them. Applications from developed countries outside the UK are highly unlikely to be funded. Grants are awarded for projects of between two and five years' duration and are worth between £10,000 and £25,000.

IN **PHARMACEUTICS** INVESTIGATOR **GRANT** AND THE PHARMACEUTICAL TECHNOLOGIES American Association of Pharmaceutical Scientists

Description:

The American Association of Pharmaceutical Scientists invites nominations for its new investigator grant in pharmaceutics and the pharmaceutical technologies. The award is a one-time grant to be used to support new academic researchers during the early stages of their careers. Nominees must demonstrate a commitment to conduct research in basic pharmaceutics, dosage form design or the pharmaceutical technologies and have the potential for outstanding achievement in teaching and research in these areas as well as the potential to be future leaders in pharmaceutical education and research.

The applicant must be actively engaged in training graduate students and carry out basic research in pharmaceutics, drug

delivery or the pharmaceutical technologies. Nominees must have less than four years of academic experience and less than seven years of total postdoctoral experience.

The award is worth US\$25,000.

REAS OF INQUIRY - MAJOR RESEARCH GRANTS

Spencer Foundation

Description:

The Spencer Foundation invites applications for its areas of inquiry programme. The supports high programme quality investigation of education through research programmes. The foundation supports work that may contribute to improvement of education around the world. The specific areas of inquiry are:

- the relation between education and social opportunity;
- organisational learning in schools, school systems and higher education institutions;
- teaching, learning and instructional resources;
- purposes and values of education.

The foundation will also accept field-initiated proposals outside these areas.

Principal investigators must have earned a doctorate in an academic discipline or professional field or have appropriate experience in an education research-related profession and must be affiliated with an institution that is willing to serve as the fiscal agent if the grant is awarded. Proposals will be accepted from the US and internationally. Major grants are worth upwards of US\$40,000 each.

UATERNARY RESEARCH FUND Quaternary Research Association

Description:

The Quaternary Research Association invites applications to its quaternary research fund. Funding is available to foster research in any area of quaternary studies. Funding may be used for any purpose deemed suitable by the awards panel, such as for field expenses or to hire equipment. All members of the association of at least one year's standing, irrespective of age and status, may apply. Grants are typically worth between £50 and £600.

Closing date: 15 May 13

Deadline information: Deadlines on: 15 January 2013, 15 May 2013, 15 September 2013.

Posted date: 13 Nov 12

Description:

The Iran Heritage Foundation invites applications for its grants. The prime focus of projects should be the Iranian world. The foundation will consider making grants to projects that promote the study of Iranian history, art, architecture, archaeology and cultures, with support for research and

publication, conferences and seminars, and lectures and lecture series.

Owing to the limited nature of its resources, the foundation would like to see its role principally as a co-sponsor of projects rather than the sole source of support. To this end, it prefers to offer help in the form of matching

finance. Funding usually ranges from £500 to £4,000. Proposals of cooperation for projects that require funding in excess of £4000 need to be submitted to the foundation at least 18 months before the project dates.

Closing date: 15 May 13

NSTITUTIONAL DEVELOPMENT GRANTS

Wenner-Gren Foundation for Anthropological Research

Description:

The Wenner-Gren Foundation for Anthropological Research invites applications for its institutional development grants. These grants support the growth and development of anthropological doctoral programs in countries where the discipline is underrepresented and where there are limited resources for academic development. The grant may be used for any purpose to achieve the development goals of the applicant department. This may include staff/faculty or student training activities, networking activities, student fellowships, staff/faculty or student exchange with partnership institutions, equipment, library materials and other resource purchases. The grant provides \$25,000 per year and is renewable for a maximum of five years, providing a total of \$125,000. The Foundation expects applicants to arrange partnerships with one or more national or overseas institutions that can help the applicant department to achieve its development goals.

Closing date: 15 May 13 (Forecast)

Deadline information: !! Call has not yet been announced by sponsor but this is the approximate deadline we expect. This call is repeated once a year.

Description:

The Liu Institute for Global Issues, in association with Green College, invites applications for its visiting fellows in residence position. The fellowship is open to a scholar, activist, artist, leader or practitioner wishing to participate in intellectual and social life of a graduate residential college with a mandate for interdisciplinary studies. The position aims to facilitate problem-based research on global issues. The current areas of research are in sustainability, security and social justice. The institute is interested in emerging issues affecting large groups of people that need concerted action and new knowledge. The fellow is expected to develop or participate in a research group and present their research in public talks. The fellow will be provided a work space, accommodation

and meals for duration of the four-month stay. They will also receive up to CA\$5,000 to assist in facilitating an event at the institute, with additional funding available from Green College. The institute will not be able to pay a salary.

PPORTUNITIES TO WORK IN THE NEW RESEARCH COMPLEX AT HARWELL -CAREER DEVELOPMENT AWARDS Medical Research Council

Description:

The Medical Research Council invites proposals for career development awards in support of scientists wishing to work in the new research complex at Harwell. Applications are sought from researchers wishing to occupy laboratory space in RCaH

and utilise its facilities. MRC has space allocated in the RCaH building for 15 to 20 additional researchers including short term visitors and long term research teams. Preference will be given to researchers using Diamond Light Source or other facilities at the site. It is envisaged that researchers

working in RCaH, whether on a short- or long-term basis, will be employed by a university or research institute who will administer their award. Researchers will then be seconded to the RCaH for the duration of their work there.

RCaH career development awards are suitable for those wishing to establish their independent research career at the complex. The applicant must have a host institution through which the award administered. MRC will provide 80 per cent of FEC to the institution.

Closing date: 21 May 13

Deadline information: Applications due by 4pm. Deadlines on: 10 October 2012, 21 May 2013.

NSOLICITED GRANTS Environmental Research and Education Foundation

Description:

The Environmental Research and Education Foundation invites applications for its unsolicited grants program. Unsolicited proposals should consist of research projects or educational initiatives that fit within the EREF's mission statement but not within EREF's strategic research plan. proposals for educational initiatives must be used to develop tools (e.g. software, websites, curricula, webinars, seminars, etc.) that specifically promote awareness or increase knowledge of the solid waste industry. The development of tools to be used for commercial purposes, or that will be considered proprietary, will generally not be considered unless approved by the EREF a All unsolicited proposals must complete a pre-proposal application to be considered for funding. Successful preproposals will then be invited to submit a full proposal.

Awards will generally be made up to \$500,000.

Closing date: 21 May 13

Deadline information: Proposals accepted 10 days prior to, and up to, 5pm ET on closing date. Deadlines on: 21 May 2013, 1 October 2013, and repeated annually.

Posted date: 31 Oct 11

LOBAL RESEARCH COMPETITION Global Development Network

Description:

The Global Development Network invites applications its global for research competition. This competition is for individual social science researchers or developing research teams from transition countries to conduct interregional, multidisciplinary projects. Each team will be paired with mentors who are world-class researchers on the selected discipline and field. The research should focus on one of the following themes:

- education and gender;
- food security;
- political, economic and social transformations.

The teams should cover two or more countries and ideally two or more regions as well as at least two disciplines in the social sciences. Individual applicants must be permanently residing in a developing or transition country, and the principal investigators and at least half of team members must be currently residing in such a country. Researchers from developing or transition countries temporarily residing in a developed country may apply as part of a team.

The research should be completed in 18 months. Each project may receive a grant of up to US\$32,000.

Closing date: 21 May 13 (Forecast)

Deadline information: !! Call has not yet been announced by sponsor but this is the approximate deadline we expect. This call is repeated once a year.

TEA 2 PROJECTS

Description:

Eureka, through the programme Information Technology for European Advancement, invites applications for its eighth call for projects. Grants stimulate and coordinate industry-driven, pre-competitive research and development in software-intensive systems and services by bringing together partners from industry, universities and research institutes in strategic projects. Projects must involve a minimum of two different organisations in at least two different Eureka countries.

The project leader must be from an organisation established in a Eureka member country or Eureka associated country. Partners from non-Eureka countries may participate in a project provided all participants agree.

Closing date: 24 May 13

Deadline information: Project outlines invited between 19 March and 5pm on 24 May; letters of intent due 7 June; full proposals due 31 October. This call is repeated once a year.

ESAB CALL FOR RESEARCH PROPOSAL

Fondation pour la Recherchesur la Biodiversité - French Foundation for Research on Biodiversity

Description:

The Fondation pour la Recherchesur la Biodiversité invites applications for its Centre for Synthesis and Analysis on Biodiversity call for research proposal. This supports projects sharing expertise and data to address a large range of biodiversity issues at any scale, spatial and temporal. Proposals from natural and social sciences are welcome. Topics include:

- social and governance issues of biodiversity conservation and management;
- land use and habitat change;
- values of biodiversity and ecosystem services;
- biodiversity status and dynamics;
- facets of biodiversity, biodiversity conservation, biodiversity-ecosystem functioning and biodiversityecosystem services relationships;
- dynamics of and access to biological resources.

Expected project deliverables include scientific publications and other dissemination tools and activities, including international workshops, training sessions or lectures. Working groups are expected to be international, but the group leader should be a well-recognised scientist belonging to a French organisation. Each working group will meet at CESAB twice a year for periods of five to eight days, for the whole duration of the project, usually over three years. Groups will be funded with up to €190,000. Support includes payment of accommodation and daily expenses. Salaries except for not covered, funded postdoctoral associates.

Closing date: 25 May 13 (Forecast)

Deadline information: !! Call has not yet been announced by sponsor but this is the approximate deadline we expect. This call is repeated once a year.

Description:

The Society for Endocrinology invites applications for its early career grants. These may be awarded to young members of the society within no more than ten years of receiving their postgraduate degree. Grants may be awarded, for example, for the following purposes:

- as resources to gain preliminary data before applying for other external funding;
- for a specific piece of equipment;
- as resources to finalise a project;
- as short term salary funding.

grant incorporates the Marjorie Robinson endowment grant for research into diseases of the adrenal or pituitary glands.

Full, associate and nurse members may apply if they hold a minimum of one year's membership; scientists and clinicians in training may apply if they hold a minimum of six months' membership. Applications submitted by a recognised higher education research institute or medical institution will be considered.

Funds must be used within one year. The maximum value of this grant is £10,000.

ARGET VALIDATION PROGRAMME Michael J Fox Foundation for Parkinson's Research

Description:

The Michael J Fox Foundation for Parkinson's Research invites applications for its target validation programme. This supports work seeking to determine if manipulating a novel biological target has impact on Parkinson's disease-relevant animal model. The target must be clearly defined and may be manipulated through a variety of methods, including the use of pharmacological tools or biologic strategies. Intermediate tests using in vitro, ex vivo or model organisms to optimise the ideal target manipulation strategy may be included.

Applications may be submitted biotechnology or pharmaceutical companies and publicly or privately held for-profit and non-profit entities throughout the world.

The programme supports two-year grants worth up to US\$250,000 inclusive of both direct and indirect costs.

Closing date: 29 May 13

Deadline information: Mandatory preproposals due by 6pm ET, 29 May 2013; invited full applications due by 6pm ET, 7 August 2013. This call is repeated 2 times a year.

GRICULTURAL AND MEDICAL RESEARCH GRANTS

Ekhagastiftelsen

Description:

The Ekhaga Foundation invites applications for its agriculture and medical research grants.

Within agriculture the foundation supports research relating to improvement and further development of ecological agriculture (ecologically well suited agricultural systems where chemical compounds for fertilisation and other uses are replaced with ecological and biological measures of promoting production). Here the goal should be the production of high quality food that is well suited for improving the public health and development. Further, research preparation and storage of food with natural technology can be supported.

Within medicine the foundation supports research relating to the improvement and further development of such methods of healing that are natural and suited to promote the inherent human ability of selfhealing. The holistic view of the human health, where not only medicine but also the effects of food and environment are observed, is here of great importance. Research in the significance of environment and the way of life for the state of health is also supported. Furthermore, the foundation is open for contributing to the creation of a research centre in Sweden for biological medicine.

Ekhagastiftelsen does not have any restrictions regarding citizenship nationality of applicants. Non-European applicants are required to have established cooperation with a European institution. Applications are accepted from institutions as well as individual researchers.

Applications for scholarships and strategic efforts to promote a development consistent

with the aim of the foundation can be accepted. The foundation also welcomes applications for planning grants, which are used to get a better foundation for a final application of further studies. This may be in the form of workshops or seminars that may also be a part of a dialogue between researchers and the scientific advisory council of the foundation. It is the aim of the foundation to support strategic innovative projects.

ISITING SCHOLARS AND CONSULTANTS GRANTS FOR INSTITUTES IN **DEVELOPING COUNTRIES**

Abdus Salam International Centre for Theoretical Physics

Description:

The Abdus Salam International Centre for Theoretical Physics invites applications for its visiting scholars and consultants grants programme for institutes in developing countries. Funding provides assistance to institutes or research groups in developing countries requiring expert advice to enhance existing activities or to initiate a new research programme. The aim is to establish a permanent link between an outside expert in a field of physics or mathematics and the institute. The visiting scientist will be an established researcher who makes commitment to visit the host institution two or three times lasting approximately one month each over a period of three years. Grants cover the travel costs of the visiting scientist and do not normally exceed €2,500 per visit.

Closing date: 31 May 13

Deadline information: Deadlines on: 31 May 2013, 31 May 2013, 30 September 2013,

RANTS FOR SCIENTIFIC MEETINGS IN DEVELOPING COUNTRIES

Abdus Salam International Centre for Theoretical Physics

Description:

The Abdus Salam International Centre for Theoretical Physics' office for external activities invites applications for its grants for scientific meetings in developing countries. Grants are available for institutions in developing countries for conferences, workshops or schools in the fields of physics and mathematics. Funding worth up to €5,000 is available to fund travel expenses of foreign participants or speakers from developing countries except the home country. Up to 40 per cent of the grant may be used to cover board and lodging costs. Each application must show at least a matching contribution from local sources. Particular attention will be given to activities organised by the ICTP affiliated centres and federated institutions.

RCHON GENOMICS PRIZE PRESENTED BY MEDCO X Prize Foundation

Description:

The X Prize Foundation invites applications for the Archon genomics prize presented by Medco. This prize is awarded to the first team that rapidly, accurately economically sequences the whole human genome one hundred volunteer participants. The competition aims to

encourage the development of privately funded and commercially viable technologies for sequencing whole human genomes. Thus each genome must be sequenced at a maximum cost of US\$1,000 in 30 days or less. If only one team achieves the requirement for the prize, the award amount will be US\$10 million. In the case of three teams qualifying, the prize shall be split as follows:

- first prize US\$7m;
- second prize US\$2m;
- third prize US\$1m.

Prizes may also be awarded as category prizes if no teams qualify for the grand prize. This award has worldwide eligibility, with the exception of Myanmar, Iran, North Korea, Syria and Sudan. The participants in the competition should be at least 90 per cent privately funded. The registration fee for period two is US\$15,000 and for period three the registration fee is US\$25,000.

Closing date: 31 May 13 **Deadline information:** Posted date: 11 Jan 12

RANTS FOR RESEARCH, TRANSLATION AND PUBLICATION OF KOREAN LITERARY WORKS Daesan Foundation

Description:

The Daesan Foundation invites applications for its grants for research, translation and publication of Korean literary works. These promote the enrichment and globalisation of Korean culture by supporting the translation, research and publication of Korean works.

Those applying for a grant to support translation work must have full linguistic command of Korean and the target language. Any professor, researcher, student in the area of Korean literature or any translator of Korean works may apply for the research

grant, and institutes working in the area of Korean literature overseas may apply for a grant to support publications.

The grant amounts are dependant on the target language. Grants for work in English, French, German, Spanish or Japanese are up to ₩15 million, for work in Chinese, Russian, Turkish or Eastern European languages are up to ₩10m, and for work in other languages are up to ₩8m. An additional ₩5m may be available for works excessively large in size.

JUNE 2013

Description:

The Cystic Fibrosis Foundation invites applications for its clinical research grants. These support clinical research projects directly related to cystic fibrosis treatment and care. Projects may address diagnostic or therapeutic methods related to cystic fibrosis or the pathophysiology of cystic fibrosis and applicants must demonstrate access to appropriate controls and to a sufficient number of cystic fibrosis patients from accredited care centres.

Single-centre clinical research grants are worth up to US\$100,000 per year for a period of up to three years. Multi-centre clinical research grants are worth up to US\$225,000 per year for a period of up to three years. In addition, up to eight per cent may be awarded for indirect costs under either grant.

NTERNATIONAL COLLABORATIVE RESEARCH GRANTS

Wenner-Gren Foundation for Anthropological Research

Description:

The Wenner-Gren Foundation for invites Anthropological Research applications for its international collaborative research grants. These support international research collaborations between two or more qualified scholars, where the principal investigators bring together different and complementary perspectives, knowledge or skills. By encouraging international collaborations, the grant contributes to the development of an international anthropology that values and incorporates different national perspectives and resources. By providing training funds, the grant helps to build capacity in countries where anthropology may be underrepresented.

collaboration **Proposals** must involve between two or more researchers of different nationalities who are working in different countries. Principal researchers must hold a doctorate or equivalent qualification in anthropology or a related discipline.

Awards of up to US\$30,000 are available to support international collaborations between two or more scholars. Proposals that include an optional training element can have an increased funding request up to a maximum of US\$35,000, of which no more than US\$10,000 can be used for training purposes.

Closing date: 01 Jun 13

Deadline information: Deadlines on: 1 June 2013, 1 December 2013, and repeated annually.

Description:

The American Society of Primatologists invites applications for its general small grants. These grants are intended for general research projects, with preference given to training initiatives, start-up funds, supplementary funding for students, and innovations in animal care and research technology.

Neither the applicant nor the mentor need be members, but they must have an ASP member sponsor their grant.

Award amounts range from \$500 to \$1,500, and will be for a period of one year.

Closing date: 14 Jun 13 (Forecast)

OINT RESEARCH GRANTS Institute for New Economic Thinking

Description:

The Institute for Economic Thinking and the International Governance Centre for Innovation invite applications for their joint research grants. Grants support research focused on key themes of interest in economics. The fourth round of funding emphasises research in the following areas:

- instability financial macroeconomic management;
- political economy of income and wealth distribution and inequality dynamics;
- governance of the international monetary and financial systems;
- innovation.

INET and CIGI will also consider proposals consistent with their mission of furthering new economic thinking.

Grants will primarily be awarded to individuals or teams affiliated with academic institutions, think tanks and other centres of vital research worldwide. Scholars in economics, as well as related fields such as political science, sociology, anthropology, history and the physical sciences are encouraged to submit proposals. Grants are worth between US\$25,000 and US\$250,000.

Closing date: 14 Jun 13 (Forecast)

Deadline information: !! Call has not yet been announced by sponsor but this is the approximate deadline we expect. This call is repeated 2 times a year.

NNUAL PROGRAMME STATEMENT FOR FOOD SECURITY, NUTRITION, BIODIVERSITY AND CONSERVATION

Agency for International Development (USAID)

Description:

The Agency for International Development (USAID) invites applications under its annual program statement for food security, nutrition, biodiversity and conservation. Funding is available for a limited number of public-private alliances to enhance food security and address issues of biodiversity and conservation in Uganda. There are two key priority areas:

- food security and nutrition: priorities include promising methods for substantially advancing coffee, maize, beans, agro-inputs, nutritional food products, financial services and information and communication technologies solutions;
- biodiversity and conservation: priorities include innovative methods for promoting ecotourism as well as ecological averting and transboundary threats.

US and non-US institutions and organisations may apply. The total estimated budget for this programme is US\$19 million. APS-617-12-000010.

Closing date: 14 Jun 13

Deadline information: Applications due 5pm EDT. Deadlines on: 14 December 2012,

14 June 2013.

ESEARCH GRANTS Muscular Dystrophy Association

Description:

The Muscular Dystrophy Association invites applications for its research grants. The association supports research aimed at developing treatments for the muscular dystrophies and related diseases of the neuromuscular system. These include muscular dystrophies, motor neurone peripheral disorders, diseases, nerve inflammatory myopathies, disorders of the neuromuscular junction, metabolic diseases of muscle and other myopathies.

Each applicant must hold a doctoral degree, and be a professional or faculty member at an appropriate educational, medical or research institution. Funding levels are unlimited for a period of one to three years.

Closing date: 15 Jun 13

Deadline information: Letters of intent due by 15 June and 15 December; full applications due by 15 July and 15 January annually. Deadlines on: 15 June 2013, 15 December 2013, and repeated annually.

ATIONAL WORKING GROUPS GRANTS

Council for the Development of Social Science Research (CODESRIA)

Description:

The Council for the Development of Social Science Research invites proposals for its national working groups grants. programme is designed to mobilise nationallevel research capacities and to channel these into organised reflections. Research may be

on any topic relevant to an understanding of the economy, politics, culture, environment and society in any African country. Proposals should be multidisciplinary in composition, sensitive to gender issues both composition and research concerns, and accommodating of younger scholars who may benefit from being mentored through their participation in the research project. Researchers from departments, faculties and research centres of African universities or established independent and research networks and centres are eligible to apply. As an indication, most of the groups funded through this programme consist of between five and seven members, although this may vary. A proportion of the funding should be used to disseminate the research findings to a cross-section of the local research community in the country in which the study takes place. There is no fixed amount for these grants although, for indicative purposes only, previous grants have been worth between \$7,500 and \$20,000

Closing date: 15 Jun 13 (Forecast)

Deadline information: !! Call has not yet been announced by sponsor but this is the approximate deadline we expect. This call is repeated once a year.

OMPARATIVE RESEARCH NETWORKS

Council for the Development of Social Science Research (CODESRIA)

Description:

The Council for the Development of Social Science Research invites proposals for its comparative research networks. The primary purpose of this scheme is to encourage the

development and consolidation comparative analytic perspective in the work of African social researchers and thereby establish a strong corpus of comparative studies produced by African scholars that could help to advance theoretical knowledge and discussion. Networks will undertake studies on or around any of the following priority research themes:

- rethinking (African) development;
- rethinking democracy (in Africa);
- engendering democracy and development;
- transitions in African higher education;
- reforming the African public sector: retrospect and prospect;
- the changing political economy of African natural resources;
- African encounters with the global system;
- the popular arts, identity and culture in contemporary Africa;
- health, politics and society contemporary Africa;
- migration dynamics and the making of new diaspora communities;
- changing rural-urban linkages;
- African integration and new regionalist impulses in Africa;
- new institutions of transitional justice;
- conflict and reconstruction in Africa;
- law, politics and society;
- state, political identity and political violence;
- political pluralism and the management of diversity;
- water and water resources in the political economy of development;
- ecology, climate and environmental sustainability in Africa;
- transport and transportation systems in Africa;
- Africa and the emerging powers of the global south;
- religion, spirituality and power in Africa:
- democracy and governance in Africa;
- media and new technology of information and communication in Africa;
- agrarian transformation;

- crises of education:
- roles and dynamics of critical actors;
- critical thought, epistemologies of knowledge production, theories and methodologies.

Researchers should highlight clearly the comparative question they wish to address. Proposals should be multidisciplinary in composition, sensitive to gender issues and accommodative of vounger scholars. Researchers based in African universities and centres of research may apply. Networks last for eighteen months and comprise, on average, between four and six members. For indicative purposes only, previous grants have ranged from \$10,000 to \$35,000.

Closing date: 15 Jun 13 (Forecast)

RANTS FOR RESEARCH AND STUDY OUTSIDE FINLAND OskHuttunen Foundation - OskHuttusensäätiö

Description:

OskHuttunen Foundation invites applications for its grants for completion of doctoral studies and postdoctoral research work at universities outside Finland. The foundation supports research on Finnish culture and economy. Eligibility criteria are as follows:

applicants for grants for completion of doctoral studies should be under 26 years of age and should have completed their matriculation examination in Finland. The host institution should preferably be one of the prestigious universities of Great Britain, but other foreign institutions or universities may be applicable if it is justified by the plan of research. Grants are awarded for two years with a possibility of extension;

applicants for postdoctoral research grant should be under 35 years of age. Funding is for one year on average but longer and shorter periods of work may be supported.

Travel expenses are not within the funding interests of the foundation. Grants are worth €18,700 per year, but additional funding may be given to cover tuition fees or family expenses.

Closing date: 15 Jun 13 (Forecast) Deadline information: !! Call has not yet been announced by sponsor but this is the approximate deadline we expect. This call is repeated once a year.

IOMEDICAL SCIENCE AND ENGINEERING THEME Samsung Advanced Institute of Technology

Description:

The Samsung Advanced Institute Technology invites applications for its biomedical science and engineering theme grants. These grants are for research from molecular level modelling to computational simulations based on clinical evidence diagnostic enabling new methods. Applications in any area under this theme are accepted, but the following subjects are of special interest:

- metabolic dynamic analysis and simulation for massive molecular network:
- computational pathology for cancer evaluation and patient prognosis;
- protein structure prediction and docking simulation;
- personal health and clinical decision support system for SMART health;
- tissue and nerve sensing technology to establish between cancerous and benign tissue;
- role of mechanotransduction in therapy.

This call is open to universities around the world. Awards will be up to US\$100,000 plus overheads, and may be renewed for up to three years based on project duration and research outcomes.

Closing date: 16 Jun 13 (Forecast)

Deadline information: !! Call has not yet been announced by sponsor but this is the approximate deadline we expect. This call is repeated once a year.

Description:

Samsung Advanced The Institute of Technology invites applications for computational science theme grants. These grants are for innovations leading way to a new framework well-suited for scientific applications. Projects should pave way for a computational environment dedicated to scientific discovery, understanding networked systems and infrastructure of data management, and groups of leading experts substantiating the resulting resources to critical research components. Applications in any area under this theme are accepted, but the following subjects are of special interest:

- high-throughput computational screening including algorithmic issues for design, synthesis, and validation of new material discovery;
- quantum-mechanical materials calculations;
- information and network theory based on statistical physics with a focus on modelling frameworks for

- technical and social observations and analysis;
- parallelisation pattern based static performance estimation.

This call is open to researchers in universities around the world. Awards will be up to US\$100,000 plus overheads, and may be renewed for up to three years based on project duration and research outcomes.

NERGY THEME Samsung Advanced Institute of Technology

Description:

The Samsung Advanced Institute Technology invites applications for its energy theme grants. The goal of these grants is to find innovative ideas to solve technological issues that need to be addressed to increase the use of renewable energy resources and making the continued use of fossil fuels more environmentally sustainable. Applications in any area under this theme are accepted, but the following subjects are of special interest:

- low frequency and ultra-wide bandwidth piezoelectric energy harvester;
- ordered bulk-heterojunction in hybrid solar cells. including investigating relationships structures and properties and more suitable architectures in these cells;
- new lithium battery materials or structure for high energy density or high power density;
- high safety energy device for electric vehicles keeping capacity, power and cycle life.

This call is open to researchers in universities around the world. Awards will be up to US\$100,000 plus overheads, and may be renewed for up to three years based on project duration and research outcomes.

MAGE SENSOR THEME Samsung Advanced Institute of Technology

Description:

The Samsung Advanced Institute Technology invites applications for its image sensor theme grants. The goal of these grants is to fund research into image sensor technology that answers the requirements of miniaturisation of IT equipment, reduced prize and advancements of technology. Applications in any area under this theme are accepted, but the following subjects are of special interest:

- high resolution computational imaging based on camera 2.0;
- development of high performance in sub-1um pixel and simulation environment:
- energy efficient column parallel two step ADCs for high-speed imaging;
- resolution enhancement of images from low resolution images;
- smart image sensor;
- silicon photonic biosensors for healthcare.

This call is open to researchers in universities around the world. Awards are worth up to US\$100,000 plus overheads, and may be renewed for up to three years based on project duration and research outcomes.

Closing date: 16 Jun 13 (Forecast)

Deadline information: !! Call has not yet been announced by sponsor but this is the approximate deadline we expect. This call is repeated once a year.

Posted date: 26 Apr 12

EDICAL TECHNOLOGY THEME Samsung Advanced Institute of Technology

Description:

Samsung Advanced Institute Technology invites applications for its medical technology theme grants. These grants are available for research that addresses issues such as need for increased sensitivity and mobility, and decreased dosage and image acquisition time in imaging, 3D modelling, and medical devices and graphics. Applications in any area under this theme are accepted, but the following subjects are of special interest:

- new generation magnetic resonance imaging, with a focus on either lowfield or real-time high-resolution 3D techniques;
- harmless medical imaging technology with real-time functional imaging;
- cardiovascular system modelling and simulation;
- organ and tissue physics property acquisition and modelling;
- magnetic resonance compatible robot systems for image guided intervention;
- tissue characterisation using ultrasound;
- functional and anatomical imaging probe system;
- laser-induced ultrasonic diagnosis systems;

- novel photo conductor materials for medical imaging x-ray detectors;
- volumetric rendering and 3D user interface for medical applications to achieve mobile health;
- self-diagnostic monitoring smart system.

This call is open to researchers in universities around the world. Awards will be up to US\$100,000 plus overheads, and may be renewed for up to three years based on project duration and research outcomes.

Closing date: 16 Jun 13 (Forecast)

Deadline information: !! Call has not yet been announced by sponsor but this is the approximate deadline we expect. This call is repeated once a year.

ETABOLIC ENGINEERING THEME Samsung Advanced Institute of Technology

Description:

The Samsung Advanced Institute Technology invites applications for metabolic engineering theme grants. These grants are available for innovative ideas in using metabolic engineering to redirect metabolic fluxes for industrial and medical purposes. Applications in any area under this theme are accepted, but the following subjects are of special interest:

- integration of metabolic modelling and omics technology, including accurate prediction and control of physiological and metabolic characteristics of enzymes in various candidate micro-organisms;
- application of synthetic biology for metabolic engineering, with a focus on designing the phenotypes that are most beneficial for the enhanced

production of biochemicals and biomaterials.

This call is open to researchers in universities around the world. Awards will be up to US\$100,000 plus overheads, and may be renewed for up to three years based on project duration and research outcomes.

EW MATERIALS THEMESamsung Advanced Institute of Technology

Description:

The Samsung Advanced Institute Technology invites applications for its new materials theme grants. These grants are available for innovations in representative materials and ideas addressing the challenges with their applications in areas of energy, electronics and optoelectronics. Applications in any area under this theme are accepted, but the following subjects are of special interest:

- ferroelectric non-volatile transistor;
- quantum dot laser;
- LED single crystal phosphor;
- heat-resistant adhesives;
- development of new biopolymers for industrial packaging;
- solution processable transparent conductive oxides;
- high dielectrics materials, instead of pure BaTiO3;
- processable solution organic electronics materials;

organic material forming the block barrier for transition metal.

This call is open to researchers in universities around the world. Awards will be up to US\$100,000 plus overheads, and may be renewed for up to three years based on project duration and research outcomes.

EW MEMORY THEMESamsung Advanced Institute of Technology

Description:

Samsung Advanced Institute The Technology invites applications for its new memory theme grants. These grants are for research into new manufacturing processes or devices with different structure or materials for non-volatile memory with fast speed and larger capacity. Applications in any area under this theme are accepted, but the following subjects are of special interest:

- next generation memory system architecture, with the end goal to provide novel multi-core memory architectures, scheduling algorithms and similar;
- vertical poly-channel transistor for 3D integration, with a focus on fabrication methods to form conformal poly-silicon films

vertical channel silicon and characterisation methods.

This call is open to researchers in universities around the world. Awards will be up to US\$100,000 plus overheads, and may be renewed for up to three years based on project duration and research outcomes.

Closing date: 16 Jun 13 (Forecast)

EXT GENERATION INTEGRATED CIRCUITS AND INTERCONNECTIONS THEME Samsung Advanced Institute of Technology

Description:

The Samsung Advanced Institute Technology invites applications for its next generation integrated circuits and interconnections theme grants. These grants are for research that investigates the relationship between the structure of materials, such as grapheme, novel organic and compound materials, at atomic or molecular scales and their macroscopic properties to enable their application in future devices. Applications in any area under this theme are accepted, but the following subjects are of special interest:

- biomolecule-based nanocontroller and interface:
- 2D electronic devices;
- organic electro-chemical transistor for biological applications;
- wireless interconnection chips, modules and boards;
- new 3D interconnection technology for stacked silicon-devices;

- high-mobility transistors (III-V/Ge field-effect channel) tunnel transistors, nanowire field-effect transistors;
- threshold voltage variability studies scaled 3D metal-oxidesemiconductor field-effect transistor devices.

This call is open to researchers in universities around the world. Awards will be up to US\$100,000 plus overhead, and may be renewed for up to three years based on project duration and research outcomes.

Closing date: 16 Jun 13 (Forecast)

Deadline information: !! Call has not yet been announced by sponsor but this is the approximate deadline we expect. This call is repeated once a year.

SER EXPERIENCE (UX) THEME Samsung Advanced Institute of Technology

Description:

Samsung Advanced Institute Technology invites applications for its user experience (UX) theme grants. These grants are for research innovations in the user experience technology. UX technology is an integrated collection of technologies and methodologies that provide the ability to design and deliver user interface and presentation capabilities with a wide variety of media. Applications in any area under this theme are accepted, but the following subjects are of special interest:

advanced spoken dialogue agent, including the methodology that makes a more personalised dialogue agent by utilising real user data log and user profile;

digital media concepts and scenarios based on the experience of paper use, with a wide range approach that examines how users may change their

- habit from paper to a digital device with minimal stress;
- next generation user interface methodology of portable smart electronics.

This call is open to researchers in universities around the world. Awards will be up to US\$100,000 plus overheads, and may be renewed for up to three years based on project duration and research outcomes.

Closing date: 16 Jun 13 (Forecast)

Deadline information: !! Call has not yet been announced by sponsor but this is the approximate deadline we expect. This call is repeated once a year.

ROCESS AND DESIGN FOR NEW PRODUCT DEVELOPMENT Samsung Advanced Institute of Technology

Description:

The Samsung Advanced Institute of Technology invites applications for process and design for new product development theme grants. These grants are for developing cost effective, high quality, fast delivery design test methodologies and solutions with a view to optimisation. Applications in any area under this theme are accepted, but the following subjects are of special interest:

- low cost nano-patterning technology for large areas;
- development and testing technology for mobile platforms;
- system efficient electrostatic discharge design methodology;
- modelling analysis and of delamination and humidity diffusion into packages;
- embedded software quality assurance by third parties;
- better-than-worst-case designs;
- multi-scale process simulation.

This call is open to researchers in universities around the world. Awards will be up to US\$100,000 plus overheads, and may be renewed for up to three years based on project duration and research outcomes.

Closing date: 16 Jun 13 (Forecast)

Deadline information: !! Call has not yet been announced by sponsor but this is the approximate deadline we expect. This call is repeated once a year.

Description:

Samsung Advanced Institute Technology invites applications for its system on chip (SoC) theme grants. These grants are for research that will solve the problems of increased power consumption and quality caused by rapidly increasing issues performance of systems on chip. Parallel architecture using multi-core and new circuit innovation or non-volatile reconfigurable logic are promising topics. Applications in any area under this theme are accepted, but the following subjects are of special interest:

- development of high-performance, high bandwidth, low power on-chip fabric for server SoCs:
- effective thermal throttling architecture for mobile AP SoCs estimating temperature and power consumption based on the measurements of internal activities of SoC.

This call is open to researchers in universities around the world. Awards will be up to US\$100,000 plus overheads, and may be renewed for up to three years based on project duration and research outcomes.

TED FELLOWSHIPS Technology, Entertainment, Design (TED)

Description:

Technology, Entertainment, Design invites applications for the TED fellowships. This programme is designed to bring together young innovators who have demonstrated remarkable accomplishment in the fields of technology, entertainment, design, science, engineering, humanities, the arts, economics, business, journalism, entrepreneurship and NGOs. Fellows will attend the TED conference in Long Beach, California.

Although applications are open to anyone over the age of 18 from anywhere in the world, the programme is targeted at applicants aged between 21 and 40 from Africa, Asia/Pacific, the Caribbean, Latin America and the Middle East. Proficiency in English is required.

Successful applicants will receive round-trip economy airfare, ground transportation to and from the conference location, and meals and shared accommodation on site.

Closing date: 21 Jun 13

Deadline information: Applications are invited between 28 May and 21 June 2013. This call is repeated once a year.

Posted date: 18 Dec 12

HA/ASH TRANSLATIONAL RESEARCH TRAINING IN HAEMATOLOGY 🕇 European Hematology Association

Description:

The European Hematology Association invites applications for the EHA/American Society of Hematology call for translational research training in haematology. enables 20 early-career scientists participate in a rigorous year-long education and mentoring programme to prepare them for highly productive careers in translational research.

The course is aimed at postdoctoral medical, biomedical and pharmaceutical translational scientists with under 12 years' post-MD training or eight years' post-PhD training. Each applicant must be an active member of EHA or ASH, employed in a haematology-

related research environment. EHA will fund food, hotel costs and up to €750 airfare for the spring course, two nights of hotel costs per follow-up meeting and up to €750 airfare per meeting.

Closing date: 28 Jun 13

Deadline information: Letters of intent due 28 June; invited applications 5 by September 2013.

PECIAL PROGRAMME ON ISLAM, THE MODERN NATION STATE AND TRANSNATIONAL MOVEMENTS Gerda Henkel Foundation

Description:

The Gerda Henkel Foundation invites proposals for its special programme on Islam, the modern nation state and transnational movements. Projects may take the form of research projects or scholarships. Publishing aid is also available for projects already supported by the Foundation. Research should address:

- historical and present-day Islamic systems of society and state;
- the concept of nation, national movements and nationalism in Islamic civilisation:
- Islamic fundamentalism or Islamic emancipation;
- civil society movements in the Islamic world;
- Islamic states in the international world system.

Closing date: 28 Jun 13

INNITUS RESEARCH GRANTS American Tinnitus Association

Description:

The American Tinnitus Association invites application for its tinnitus research grants. The program supports scientific studies investigating tinnitus with the goal of finding a cure.

Scientists and doctors, worldwide, who are affiliated with non-profit institutions, are eligible to apply.

ATA awards research grants of up to \$50,000 per year for up to three years, for a potential maximum of \$150,000.

Closing date: 29 Jun 13 (Forecast)

Deadline information: !! Call has not yet been announced by sponsor but this is the approximate deadline we expect. This call is repeated once a year.

ESEARCH GRANTS Northern Nut Growers Association

Description:

The Northern Nut Growers Association invites applications for its research grants. Grants are offered to those institutions or individuals doing research on temperate zone tree nuts. Any topic dealing with temperate zone tree nuts is eligible. Projects are favored that are no more than two years in duration and require no more than US\$5,000 from the NNGA. Suggested topics include:

- propagation;
- germplasm and cultivar evaluation;
- pest management and pest biology;
- mechanical harvesting;
- postharvest handling and processing;
- orchard establishment;
- orchard care and maintenance; •
- marketing;
- basic biology and ecology;
- exchange, foreign especially germplasm.

Anyone who has an interest and capability to perform research is eligible. This includes NNGA members, academic professionals, private individuals, and corporations.

Closing date: 29 Jun 13 (Forecast)

Description:

The Saint Geertruids Loan Foundation invites applications for its grants. The foundation aims to financially support students whose parents do not have the financial means to support them in their studies.

To be eligible for this grant, the following criteria must apply:

- the combined income of the applicant's parents must not exceed €32,500 per year;
- the proposed study must take place at a university or college;
- relatives of the founder of the foundation, as well as students of

theology and religion, will take preference over other students.

The grant is worth up to €2,000 per year.

Closing date: 30 Jun 13

Deadline information: This call is repeated

once a year.

Posted date: 02 Nov 12

Award type: Financial aid for postgraduate students, Directed grants for individual

investigators

Award amount max: €2,000 Award amount min: -Award budget total: -
